

Agvance Contain

Container Management
On The Go

Use Contain on its own or as a companion app to Warehouse to access and maintain container processing. Working in conjunction with Refillable Container Management in Agvance, multiple types of activities can be performed right from your device.

From receiving, filling, or unloading to inspections, cleanouts, or routine maintenance, all activities are recorded in real-time so container information is always up to date.

CONTAINER ACTIVITIES

- Access the app from both iOS and Android phones and tablets
- Customize the container list through settings/filters
- Set the location for containers
- Search or use bar code scanning to find a container
- Perform container activities recording activity dates, times, notes, products, quantities or indicating passed tests, as applicable
