

USING THE INFORM APP, SALES STAFF CAN...

- Update mobile staff of blend ticket status and job progress
- View the work order pipeline and view real-time status of application jobs
- Track and monitor the progress of assigned jobs
- View job queue on a map to relay real-time status to customers
- Mark a nearby field's crop chemistry on a map for vision by dispatchers and applicators

- View ticket status and job details
- Filter the list based on ticket status, date range, etc.
- Send job-specific messages to the dispatcher
- Mark blend tickets as "Ready" to notify the dispatcher that the job is ready for assignment
- View applicators schedules and the order of pending jobs
