Work Orders - Agvance SKY Customer

Last Modified on 07/06/2026 3:57 pm CDT

Agvance SKY Work Orders make it easy for on-the-go staff to enter orders for services like crop scouting and soil testing. Work Orders are saved in Agvance Windows as Delivery Tickets, which can be dispatched out using Agvance SKY Dispatch.

Work Orders can be started on the *Fields* tab in the *Fields, Tanks, ...* area of Agvance SKY Customer. For more information, see **Fields - Agvance SKY Customer**.

Use the *Search* field to find specific Work Orders by *Work Order #*, *Service Name*, *Ticket Date*, or *User*. Full or partial dates can be searched.

Select the **Ellipsis** to *Reverse* or *Void* a Work Order.
