

# Work Orders - SKY Customer

Last Modified on 08/15/2025 11:46 am CDT

Agvance SKY Work Orders make it easy for on-the-go staff to enter orders for services like crop scouting and soil testing. Work Orders are saved in Agvance as Delivery Tickets, which can be dispatched out using the Agvance Dispatch module.

Work Orders can be started on the *Fields* tab in the *Fields, Tanks, ...* area of SKY Customer. For more information, see [Fields - SKY Customer](#).

Use the *Search* field to find specific Work Orders by *Work Order #*, *Service Name*, *Ticket Date*, or *User*. Full or partial dates can be searched.

Select the **Ellipsis** to *Reverse* or *Void* a Work Order.

Bookings	Plans	Blends	Deliveries	Sales Orders	Product Delivery Orders	Work Orders
