Fields - Agvance SKY Customer

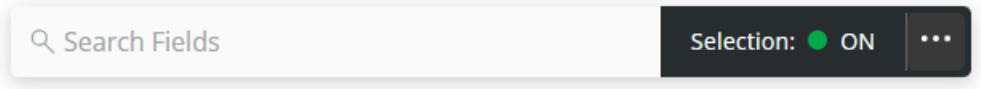

Last Modified on 08/19/2026 8:54 am CDT

Overview

Fields can be viewed as cards or as a grid similar to an Excel spreadsheet. Select the icons at the top to switch between the two options.

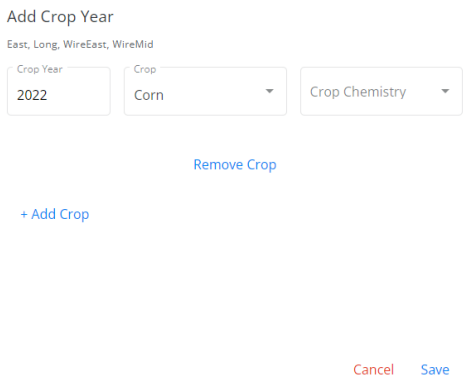

Use *Search Fields* to search by *Field ID*, *Description*, or *Farm ID*.

Options under the **Ellipsis** are available after turning the *Selection* mode to *ON* and choosing one or more Fields.

Note: See the video below for more on initiating Agronomy Orders.

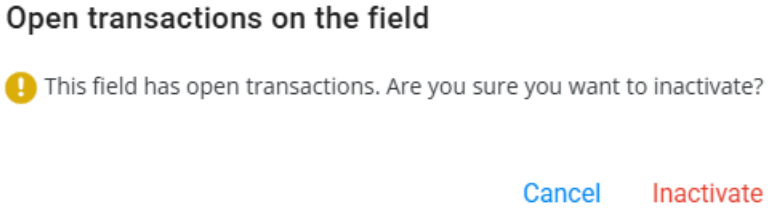

- **Select All**
- **Deselect All**
- **Start Plan** (Add a Plan)
- **Start Blend** (Add a Blend)
- **Start Work Order** (Add a Work Order)
- **Edit Tillage Type** – Select all Tillage Types that apply with the appropriate Field(s) selected and **Save**.
- **Add Crop Year** – Enter the 4-digit *Crop Year*, select the *Crop*, and optionally indicate the *Crop Chemistry*. Select **+ Add Crop** to add additional *Crop Years*/*Crops*.

- **Inactivate Field** – If the *Edit Field Information* Role permission is enabled in Agvance SKY Admin, an option is available to set the Field's status to *Inactive*.

  Note: If the Field has any open transactions (uninvoiced Blend or Delivery Tickets) a message will display to

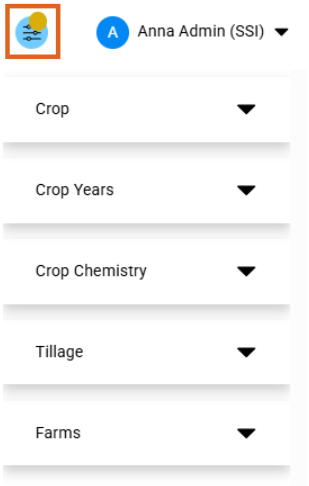

indicate there are open transactions and provide the option to **Inactivate** the Field or **Cancel**.

Initiating Agronomy Orders

Viewing Fields

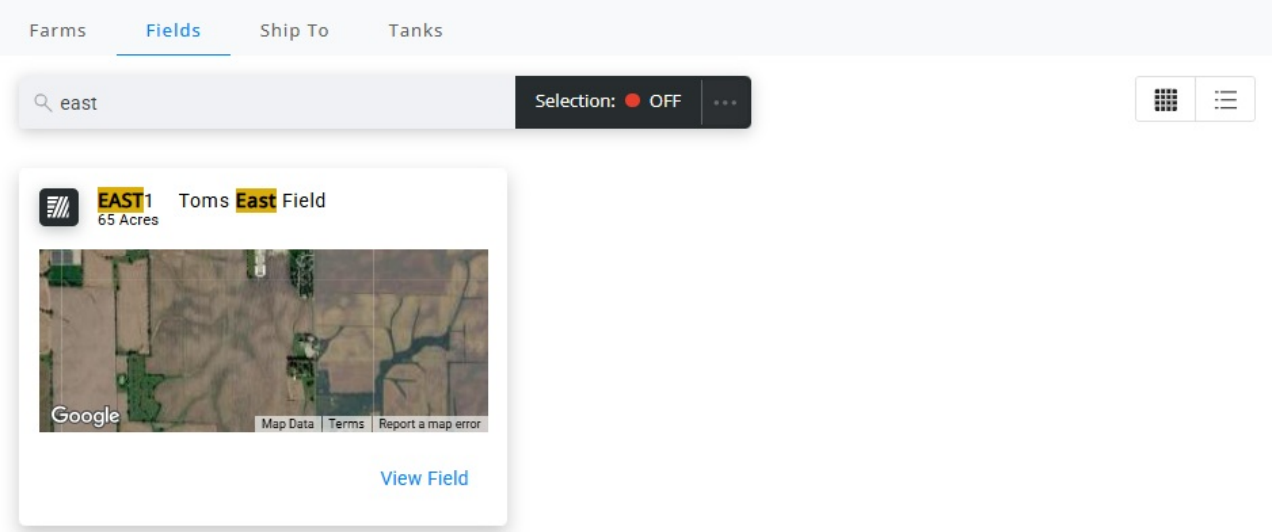

Choose the **Filters** icon to narrow down Fields by *Crop*, *Crop Years*, *Crop Chemistry*, *Tillage*, and/or *Farms*.

Card View

The Fields associated with the selected customer display as individual cards which include a *Farm ID*, *Acres*, and any *Billing Splits* established with the Field.

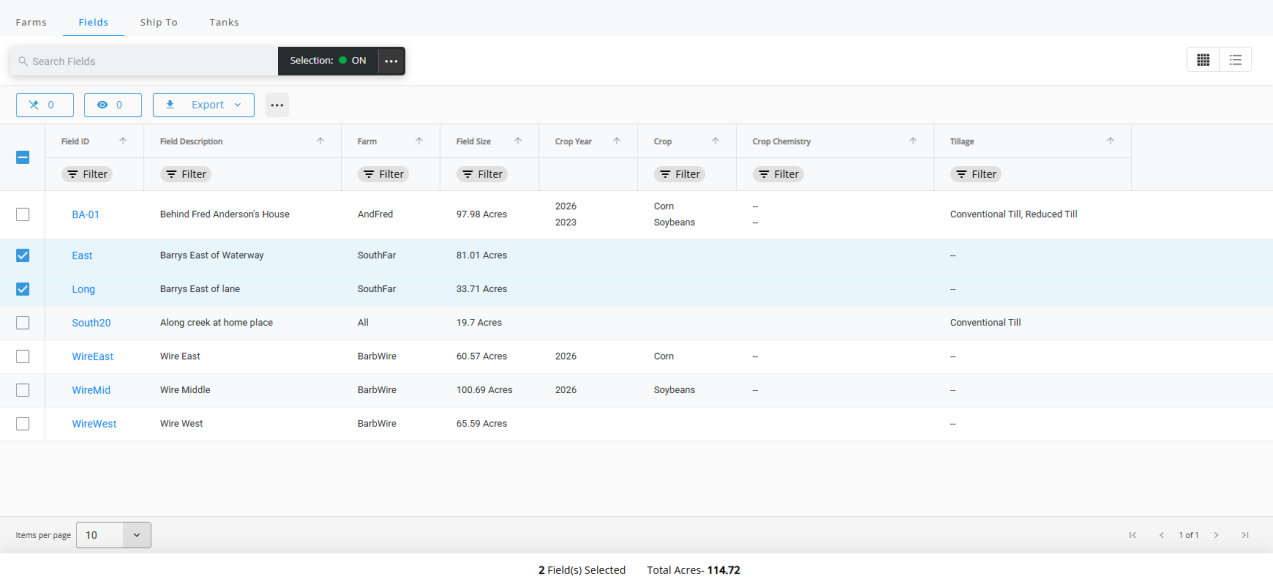

Selecting the map expands the *Field* card to provide more options such as zooming and moving the map around.

Grid View

The grid operates much like an Excel spreadsheet. For more on how the grid works, see **Using Grids in Agvance SKY**.

When Fields are selected, the number of *Field(s) Selected* and the *Total Acres* display at the bottom of the screen.

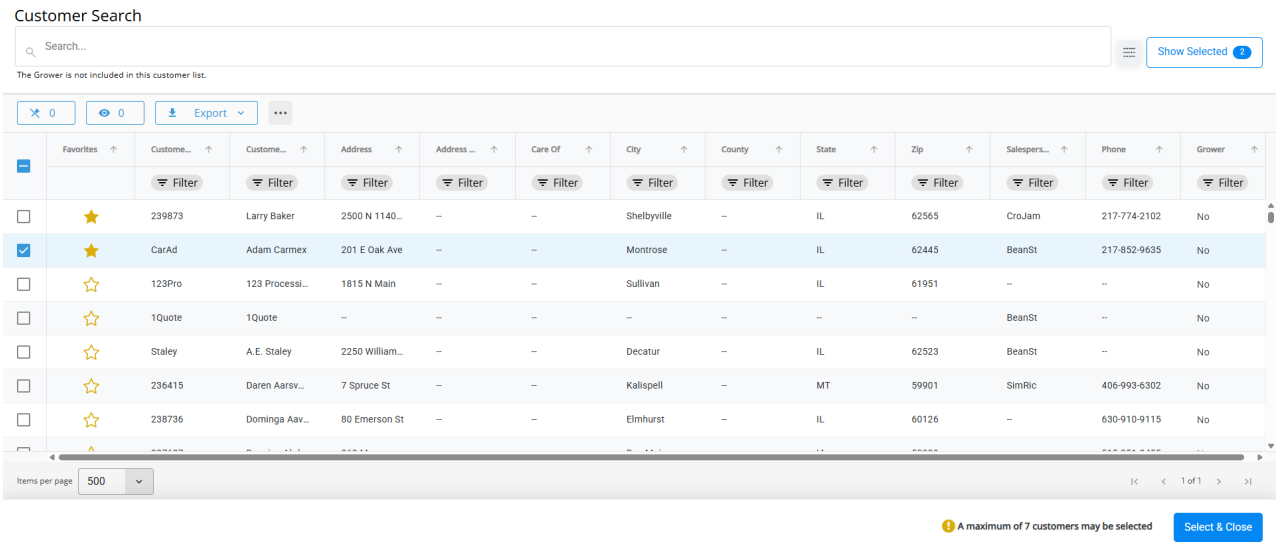

Field Details

Information regarding the specific Field can be displayed by selecting **View Field** (in *Card View*) or by selecting the **Field ID** (in *Grid View*).

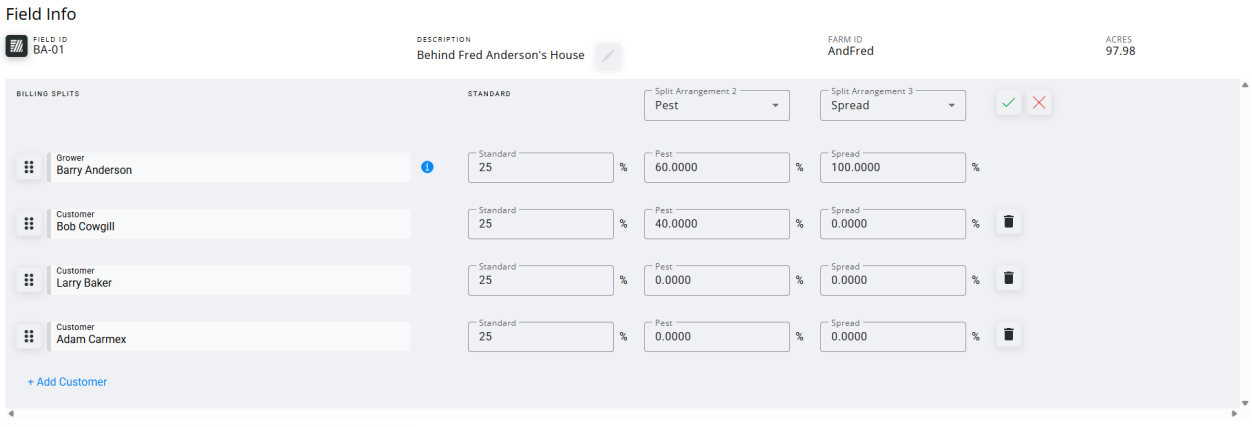

If the *Edit Field Information* Role permission has been enabled in **Agvance SKY Admin**, the *Field Description* and *Billing Splits* can be modified. Select the **Edit** icon, make the needed changes, then choose the **Checkmark** to confirm the updates (or the **X** to discard the changes).

Customers can be added to Billing Splits by selecting **+ Add Customer**. A maximum of seven Customers can be selected. Choosing **Show Selected** displays the Customers currently selected to be included in the split (the Grower is not included in the Customer list).

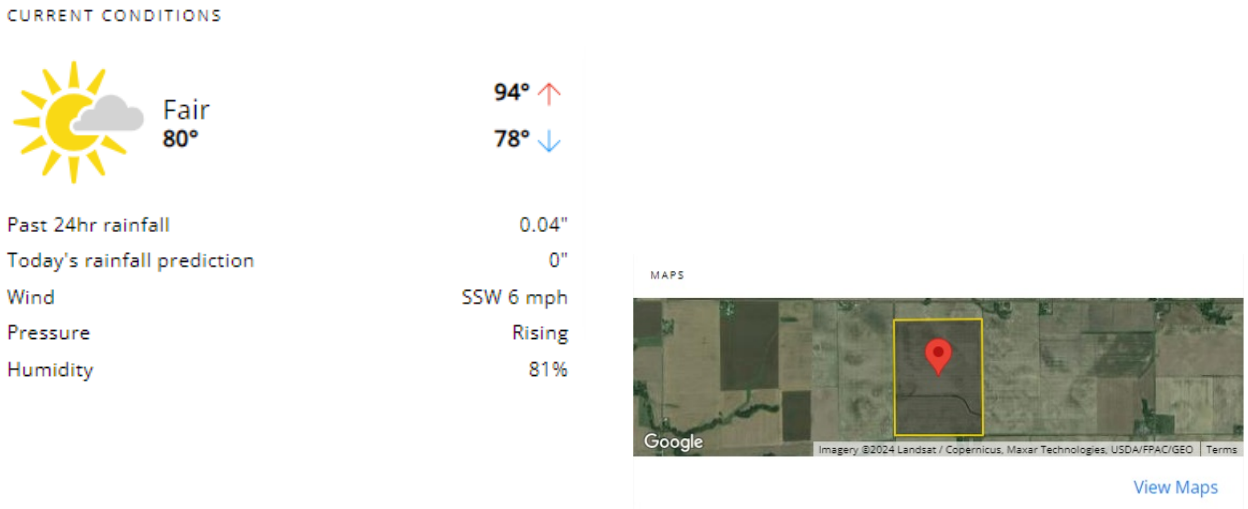

Note: The Grower cannot be removed from Billing Splits.

Customers (besides the Grower) can be reordered by selecting the grid of dots to the left and dragging to the appropriate row.

Current weather conditions display as well as the Field map.

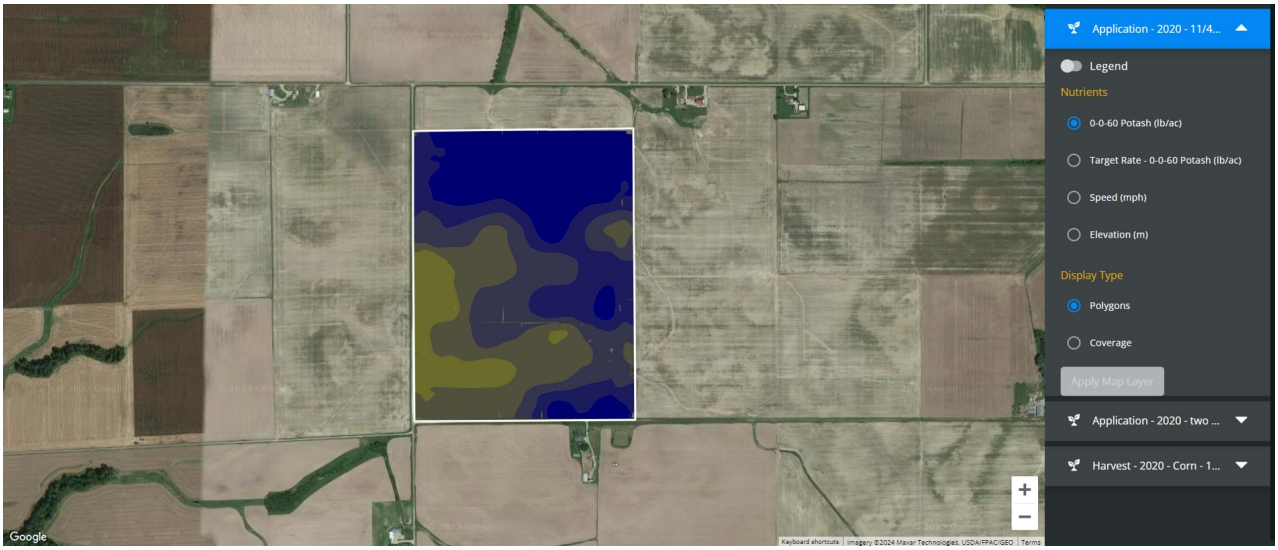

Note: The **View Maps** option is only available if linked to Agvance SKY Mapping.

Field Map

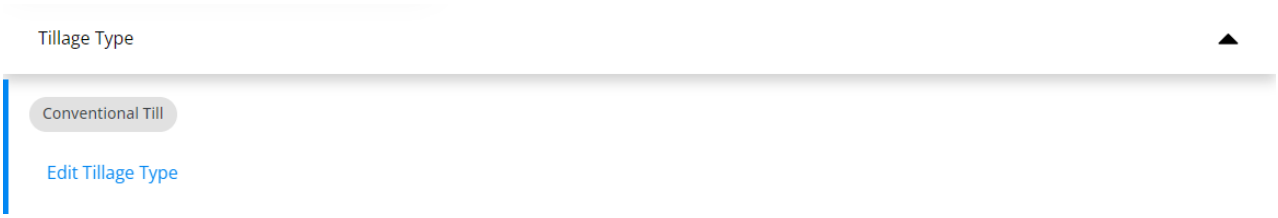

Agvance SKY Mapping Layers (*Soil Type*, *Application Layer*, and *Yield Layer*) display on the field if linked to Agvance SKY Mapping. More information regarding setting up Agvance SKY Mapping layers in Agvance SKY Admin can be found here.

Select **View Maps** to see Agvance SKY Mapping layers for that Field.

Tillage Type

Tillage information can be added and edited by selecting **Edit Tillage Type**.

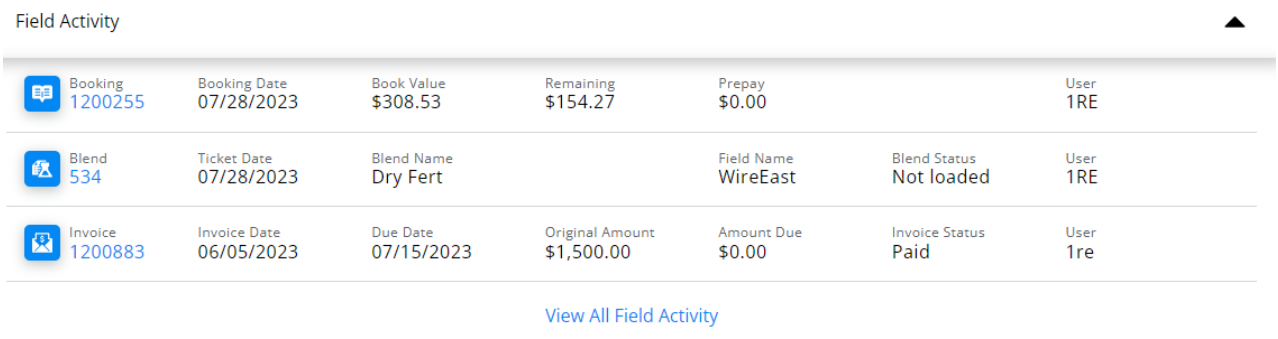

Choose the desired *Tillage Type(s)* then select **Save**. Multiple Tillage Types may be chosen.

Field Activity

Optionally add Crop Years, view Plans for this Field, and view Field Activity.

Grower360

The *Tillage Type* and *Crop Year* will populate on the Field in Grower360.
