Tanks - Agvance SKY Customer

Last Modified on 07/07/2026 7:31 am CDT

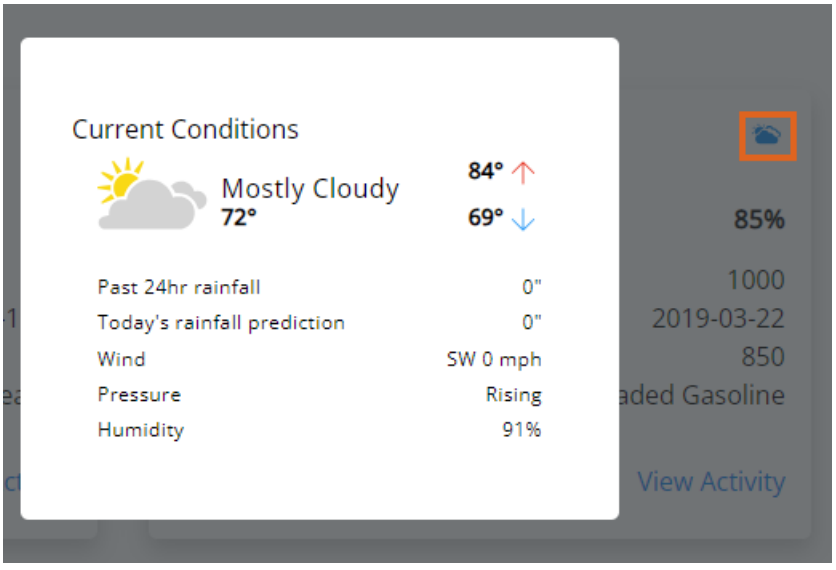

Tank information is displayed with the option to search for Tanks by Tank *Name* or *Product*.

If Tank Monitor Readings are being recorded within Agvance, those values will display in the *Est Tank Percentage* area.

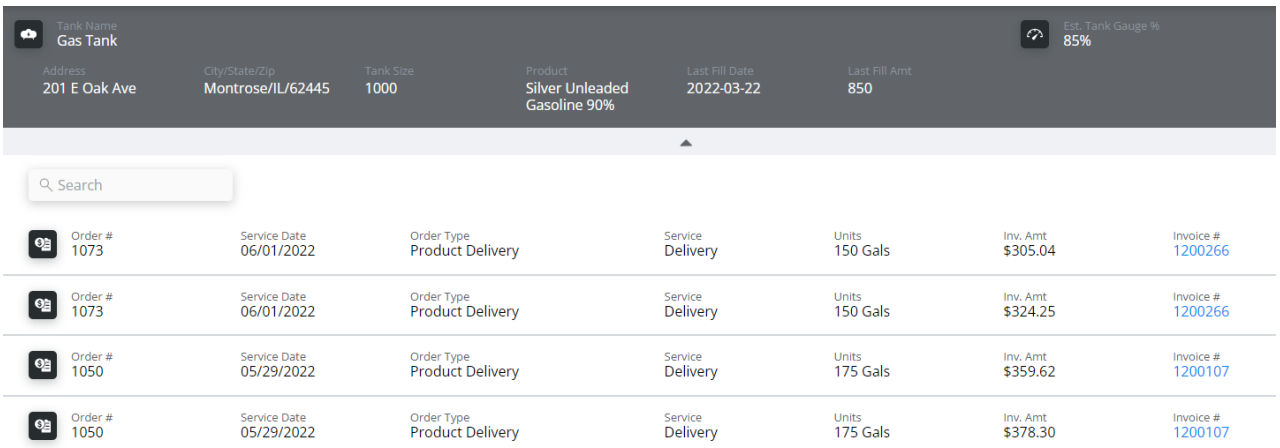

Current weather conditions can be viewed by selecting the icon in the upper right of the card.

Note: The Tank's Lat/Lon will be used for *Current Conditions*. If not present, the Tank's address will be used.

Selecting **View Activity** opens the history for that Tank. Search for specific orders under that tank by keying in the *Search* field. Optionally search by *Order #*, *Service Date*, *Units*, and *Invoice #*.
