Settings - Warehouse

Last Modified on 05/05/2025 3:42 pm CDT

Selecting the **Settings** icon (cog wheel) in the top right corner of the home page displays three options: *About*, *Location*, and *Preferences*.

About

This displays the App Version, API URL, and the Database ID being used.

App Version	
API URL https://api.agvance.net	
Database ID	

Select the Back Arrow to return to the Home Page.

Location

The *Location* window displays a listing of all locations accessible to the user. The user permissions established in Agvance are honored within Warehouse. If a user is not provided access to a location, it will not be displayed in this window. Optionally choose *Favorite Locations* by selecting the **Star** icon on the *Location* row. Then, when selecting locations, an option to view *All* or *Favorites* displays.

Note: For those using a version of the Warehouse app lower than 1.6.2, uninstall and reinstall the app and enter the *API Database ID* in the *About* section.

Selecting a Location in this window determines the default Location used throughout the app.

Select the **Back Arrow** icon to return to the Home Page.

Preferences

Determine the Inbound Receiving Style which is the Bill of Lading (BOL) style established in Agvance.

- Inbound Receiving Style
 - Ag This style is designed for organizations using Warehouse for inventory purposes and is considered more of a summarized style. The *Product* and the *Quantity* are listed on the BOL.
 - **Store** This style is designed for users in a convenience store setting and includes detailed costing information.
- Bar Codes If using bar code scanning, use the toggle to turn on access to the camera.
- Search Length Before Starting Query This reflects the number of characters to be entered before a search of the database is triggered.
