

Multiple Products Found on Select EDN Window

Last Modified on 12/30/2021 3:20 pm CST

When selecting EDNs for an Agvance transaction, some of the lines say *(Multiple products found)* in the *Prod Name* column.

Select EDN

Delivery Number

	Vend. Prod.	Dept ID	Prod ID	<Prod Name>	Quantity	Units	Lot #	Cust Order Number	Contract Number	Cust Order Line	Po	Po Line Item
1	00070183885649	1200BY	15200	Palet Wood 54X40 2 Way Domestic	1	CS2						
2	0088834682737			(Multiple products found)	10	BG	TEST123	913439620		460		

Multiple products found indicates the product exists in multiple departments in the currently logged in location. Nothing is shown if the same product exists in other locations. The current location is the default but double-clicking on the Product Name opens the *Select Product from Attribute* window providing the ability to see and select other locations' products.

Select Product from Attribute

DepartID	ProdID	Product Name	Amt On Hand	Inv Unit
1200BY	180417	AG26X8 RR2X...	1.000	Bags

Select from the list above or double click in the textbox below to select a product. Use the Location filter to filter the list of products in the list above.
