

Product Availability

Last Modified on 08/11/2023 7:51 am CDT

This utility allows the selection of a product, and then displays the costing information, units, EPA information, and lot information if applicable. **Calc Avail for Sale** calculates the quantity available for sale. **Calc Pending Usage** displays the pending usage information as seen on the Pending Usage report in Accounting Reports.

Upon selecting **Calc Pending Usage** the *Available to Deliver* column displays and is calculated as *Amount on Hand - Unloaded Delivery and Blend Tickets - Quantity on Released Product Requests*.
