

Moneris Phoenix Transactions

Last Modified on 01/03/2024 9:15 am CST

For companies processing credit card transactions using the *Phoenix Host* option through the *Moneris Bankcard Interface*, this area displays the credit card transactions. Transactions may be viewed and receipts can be reprinted.

The screenshot shows a software window titled "Moneris Phoenix Transactions". At the top, there is a header bar with standard window controls (minimize, maximize, close). Below the header is a table with the following columns: Reprint, Condition Code, Transaction Code, Payment Date, Amount, Card Number, Card Expiration Date, and Advance T. The table area is currently empty. Below the table is a horizontal scrollbar. At the bottom of the window is a "Filter" section with several input fields and buttons. The "Filter" section includes: "Transaction Date" with "Start Date" and "End Date" both set to "01/03/2024"; "Location" set to "00MAIN"; "Advance Payment #" with an empty text box; "Card Type" with a dropdown arrow; "Last Four Digits of Card" with an empty text box; "Payment Amount" with an empty text box; "Printer" set to "NP169D518 (HP LASER)"; "# of Duplicates" set to "0"; and "Printer Type" set to "Standard". There is an "Apply" button next to the "Payment Amount" field. At the bottom right of the filter section are "Print Receipt" and "Cancel" buttons.

Reprint	Condition Code	Transaction Code	Payment Date	Amount	Card Number	Card Expiration Date	Advance T
---------	----------------	------------------	--------------	--------	-------------	----------------------	-----------
