

Worldpay

Last Modified on 01/03/2024 9:16 am CST

When using Worldpay for processing customer payments by credit card, this area stores the setup information and displays the transactions processed. For detailed information on this setup, contact SSI Customer Support.

The screenshot shows a software window titled "Worldpay" with two tabs: "Location" and "Transactions". The "Location" tab is active. The window contains the following sections:

- Location:** Includes a "Test Mode" checkbox, a dropdown menu set to "00MAIN", a text field containing "SSI Farm Services - IL", and a "Use Worldpay" checkbox.
- Terminal ID:** A text field, a "Require AVS fields for card not present transactions" checkbox, and a checked "Duplicate Checking" checkbox.
- Host:** Three text input fields labeled "Acceptor ID", "Account ID", and "Account Token".
- Devices:** A list box with "Description" selected. Below it is a "Show All" button and a label "Show all devices that have the Host credentials".
- Device Setup:** Fields for "ID", "Description", "Idle Message" (with up/down arrows), and "Activation Code".
- Buttons:** "Add", "Edit", "Delete", and "Save" buttons are located below the Device Setup fields. "Save" and "Cancel" buttons are at the bottom right of the window.
