

Grower360 Banner Display

Last Modified on 01/10/2025 2:01 pm CST

The Banner Display can be set up at *SKY Admin / Grower360 / Banner Display*.

Banner Display

Customize your banner content on the [Grower360 Overview](#).

MANAGE

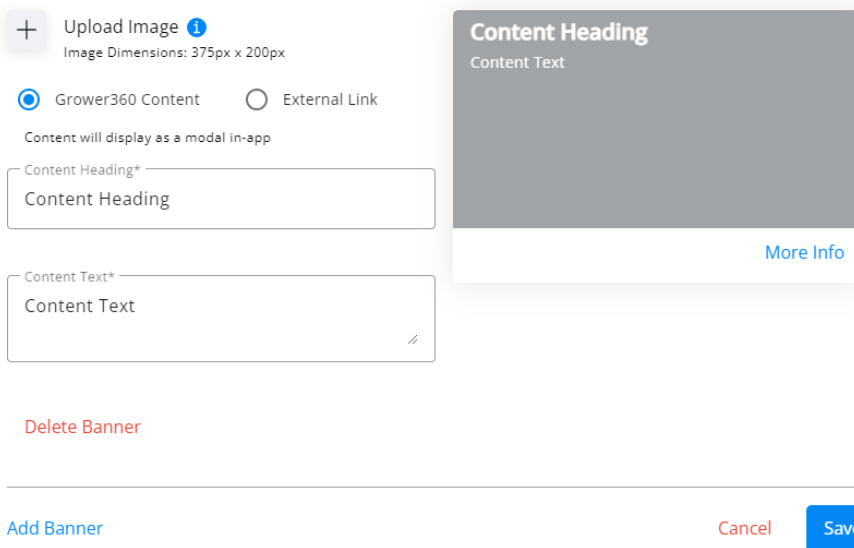

Banners will be displayed in the order they are uploaded with the newest being first.

Note: Edits will NOT affect the order of the banner. Editing an existing banner will not push that banner to the front. Only NEW banners will be placed first.

Create custom banners to display at the top of the *Grower360 Overview* page for customers to view. A preview of the banner will display on the right.

1. Select **Add Banner**.
2. Optionally choose the + icon to upload an image. It is recommended the image size be 375 x 200 pixels.
3. Choose *Grower360 Content* or *External Link*.
 - *Grower360 Content* will display an image or text to the Grower from within Grower360. The *Content Heading* and *Content Text* fields are required.

Note: Text entered in the *Content Heading* and *Content Text* fields will not display if an image has been uploaded. This information will display upon selecting **More Info** on the banner.

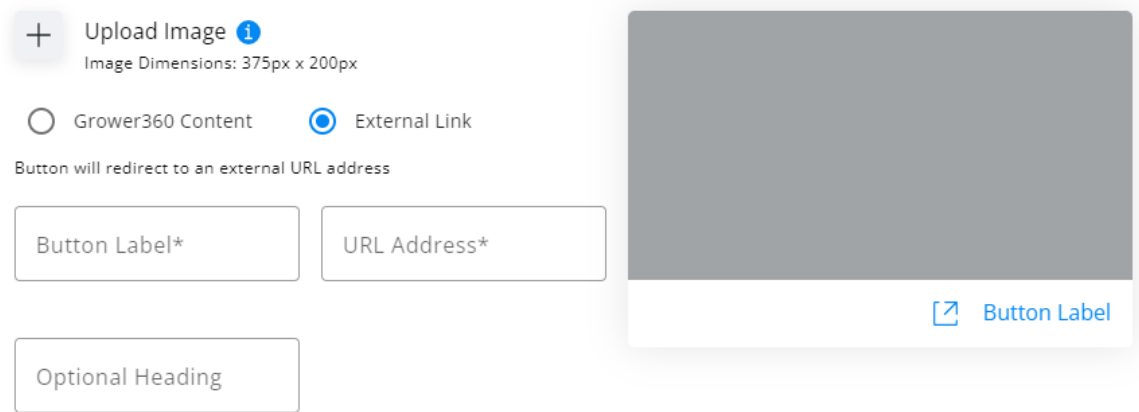

The form includes an 'Upload Image' section with a plus icon and an information icon, with a note 'Image Dimensions: 375px x 200px'. Below this are two radio buttons: 'Grower360 Content' (selected) and 'External Link'. A note states 'Content will display as a modal in-app'. There are two text input fields: 'Content Heading*' and 'Content Text*'. To the right is a preview of the banner, showing a grey header with 'Content Heading' and a white body with 'Content Text' and a 'More Info' link. At the bottom of the form are three buttons: 'Delete Banner' (red), 'Add Banner' (blue), and 'Cancel' (red) next to a 'Save' button (blue).

- An *External Link* allows the Grower to select banner and open the designated link in a new tab. The

Button Label and URL Address fields are required. The *Optional Heading* will only display if no image is uploaded.

Note: The URL must be complete and include *https://* at the beginning.

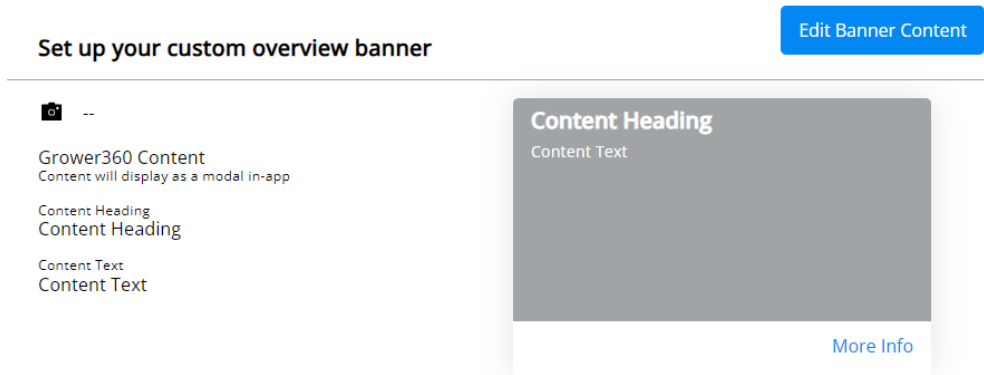

The form includes the following elements:

- Upload Image** (with an information icon) and **Image Dimensions: 375px x 200px**
- Grower360 Content** and **External Link**
- Text: **Button will redirect to an external URL address**
- Button Label*** and **URL Address***
- Optional Heading**

The preview on the right shows a grey banner with a white bar at the bottom containing a blue link icon and the text **Button Label**.

4. **Edit Banner Content** can be selected once a banner is saved. This gives the ability to add additional banners or edit/delete existing.

The interface features a blue button labeled **Edit Banner Content** in the top right corner.

The main heading is **Set up your custom overview banner**.

On the left, there is a list of content items:

-
- Grower360 Content**
Content will display as a modal in-app
- Content Heading**
Content Heading
- Content Text**
Content Text

On the right, a preview shows a grey banner with a white bar at the bottom containing the text **More Info**.
