Grower360 Fields - Agvance SKY Admin

Last Modified on 07/06/2026 2:35 pm CDT

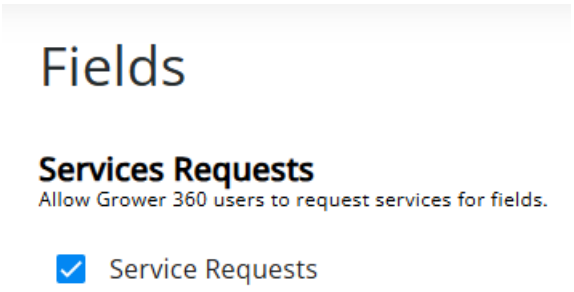

Manage Field Service Requests, FSA Data, and SKY Mapping settings by selecting **Setup** on the *Fields* card at *Agvance SKY Admin / Grower360 / Operations*.

To see a video of Grower360 Setup in Agvance SKY Admin, see **here**.

Fields

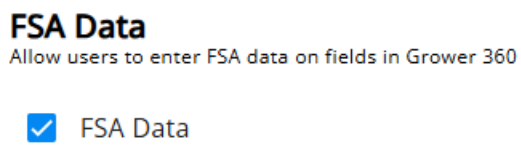

Selecting the *Service Requests* toggle on the *Fields* page allows Grower360 users to quickly request services, such as product application, for fields from within Grower360. More on Services Requests can be found on the *Field Service Requests* tab.

- Refer to **Agvance SKY Notifications** for more information on managing Subscriptions.
- Additionally, at least one Agvance SKY account must be set up to receive notifications from a Grower360 user in order for the *Request Services* option to display on a field from within Grower360.

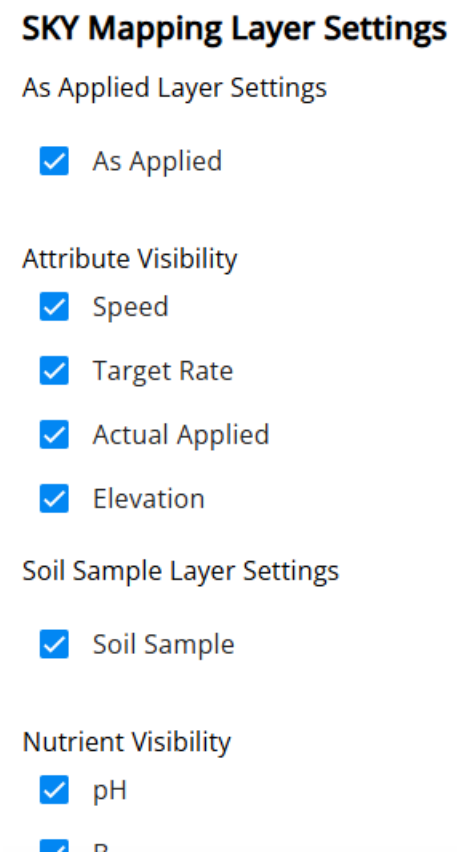

FSA Data

Check this option to allow Growers to enter FSA data on Fields in Grower360.

SKY Mapping Layer Settings

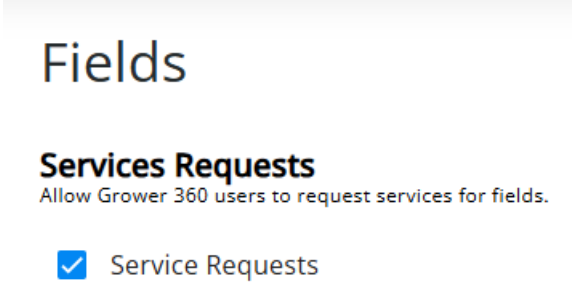

Check these options to determine to indicate what Growers have access to in Grower360. If choosing to turn one of the toggles on for *As Applied Layer Settings*, *Soil Sample Layer Settings*, and/or *Harvest Layer Settings*, indicate visibility for the specific options that display.

Field Service Requests

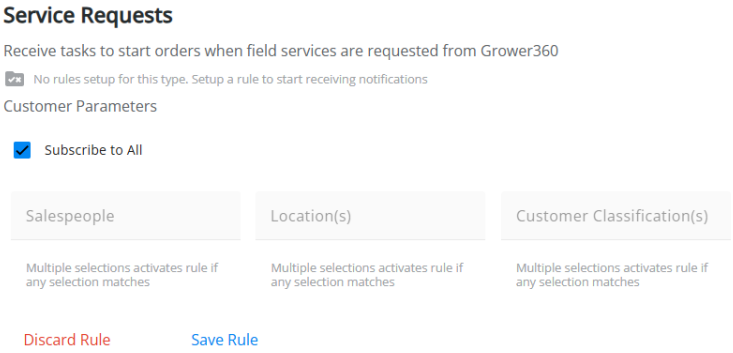

The *Services Requests* feature allows Grower360 users to quickly request Field services such as product application. In order to receive notifications from Growers, Grower360 Admin must perform the following steps.

In Agvance SKY, use the toggle found at *Agvance SKY Admin / Grower360 / Fields* to turn on the *Service Requests* option.

An Agvance SKY User must subscribe to receive Field service notifications. It is recommend at least one Agvance SKY User per company be subscribed to ALL Customers to prevent the company from missing requests.

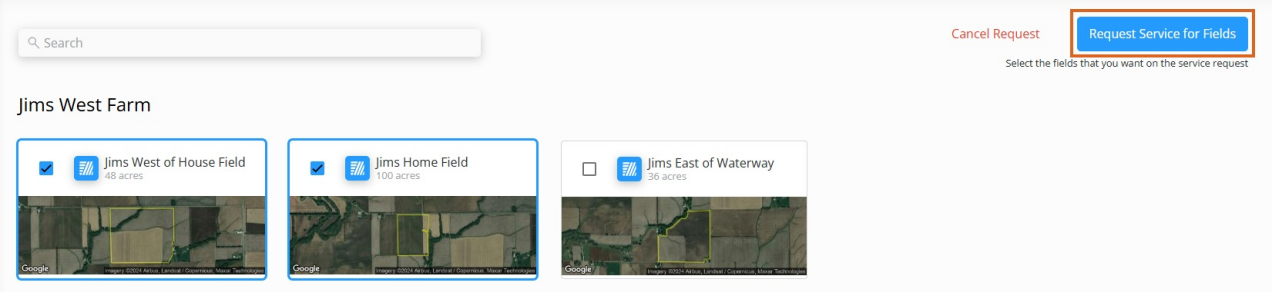

1. From the *User* drop-down, select *My SKY Account* and select **Manage** on the *Subscriptions* card.
2. Select **+ Add Rule** to set up Customer Parameters.
3. Specify *Salespeople*, *Location(s)*, and/or *Customer Classification(s)*.

   - The *Salesperson* defaults as the Salesperson selected on the User profile in Agvance SKY Admin.
   - Customers with the selected Location(s) set as the default on their profile are included.
   - Any Customers who are members of the Customer Classification(s) selected will be included.
4. Select **Save Rule** when finished.

Grower Functionality

Selecting **Request Service** from the *Fields* page of the Grower360 account allows the Grower to select the Fields to include in the service request.

Once all the desired Fields are selected, selecting the **Request Service for Fields** button displays a *Request Service* window. Here, an *Application Type* must be selected as well as a *Crop*. Optional information such as *Window of Application*, which displays in *Days*, and any necessary *Comments* can be added.

Selecting the **Make Request** button sends the service request to the Agvance SKY Account. Choose the **Expand** icon to view more information related to the service request, **View Customer** to navigate to that Customer in Agvance SKY Customer, or **Mark Resolved** to indicate the request has been completed. Enter *Comments* indicating how the request was resolved. These comments can be referenced in the task list.
