Integrations Setup

Select the **Edit** icon to enter a *DriftWatch API Key* to display sensitive crop information alongside field boundaries on maps in Agvance SKY Dispatch and Agvance Ops.

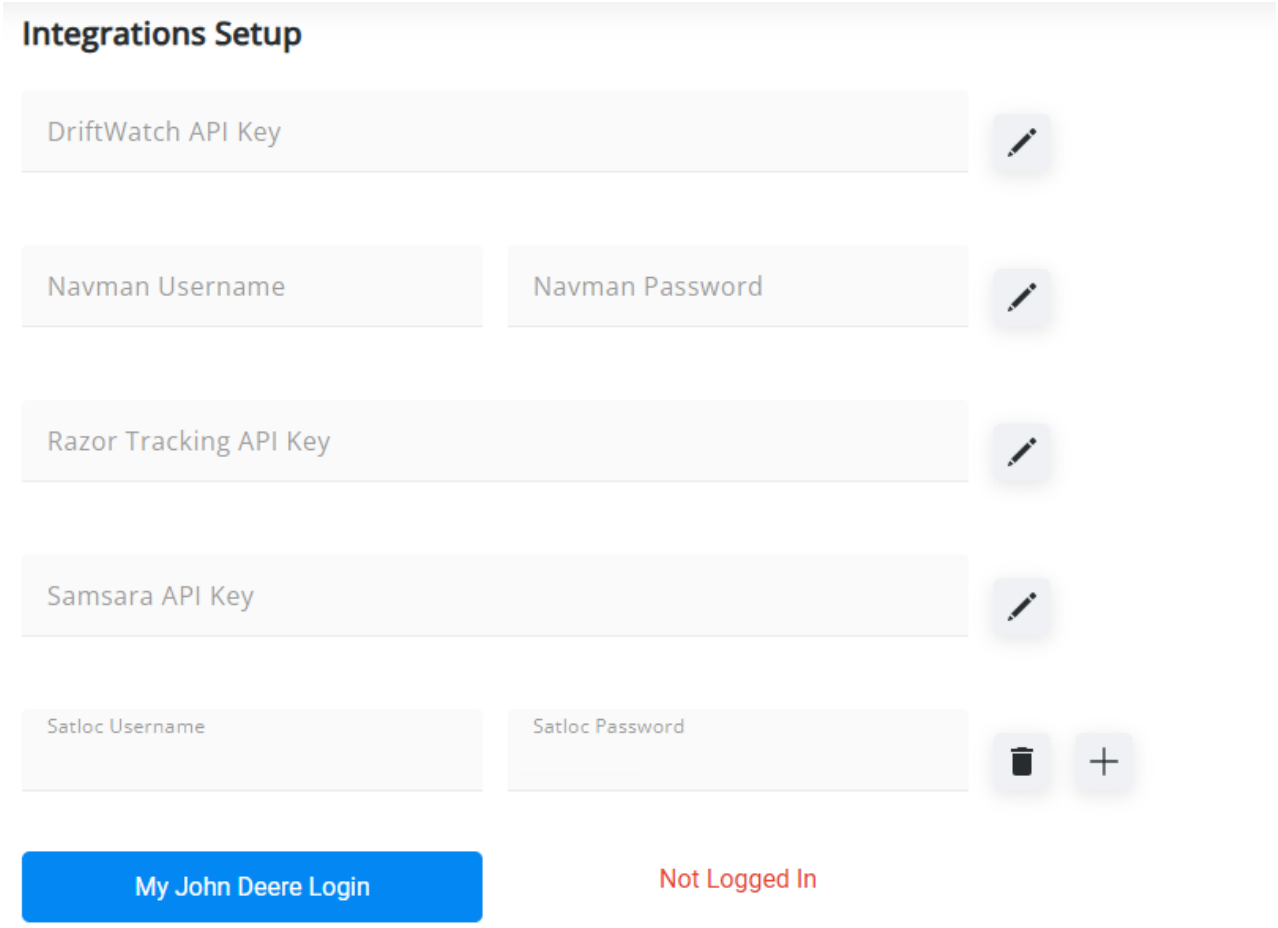

Additionally, a *Navman Username* and *Navman Password* can be entered to tie vehicles in Agvance SKY Dispatch to a Navman device. Select the **Delete** icon next to saved credentials to remove them.

A *Razor Tracking API Key* can be entered to connect Razor-equipped vehicles. See **Razor Tracking - Agvance SKY Dispatch** for setup steps.

A *Samsara API Key* can be entered to connect Samsara-equipped vehicles. See **Samsara - Agvance SKY Dispatch** for setup steps.

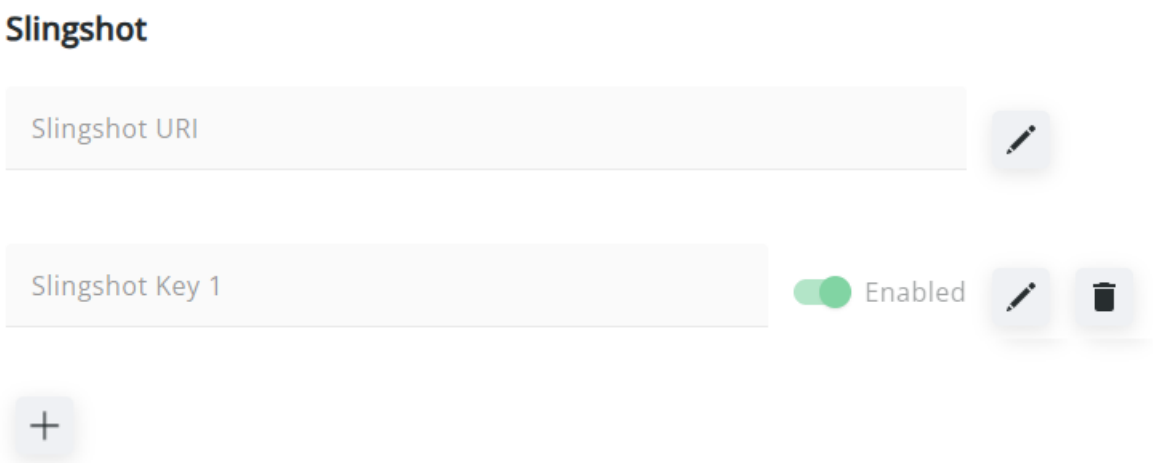

A *Satloc Username* and *Satloc Password* can be entered to connect a Satloc Cloud account for aerial application job files. See **Satloc Aerial Integration - Agvance SKY Dispatch** for setup steps.

Choosing the **My John Deere Login** button here navigates to the login page for My John Deere. This gives the ability to be signed into My John Deere within Agvance SKY at the Company level. The red *Not Logged In* text displays to indicate there is no connection to a My John Deere account.

Slingshot

Under Slingshot, a *Slingshot URI* and one or more *Slingshot Keys* can be entered to connect devices through Raven Slingshot. See **Slingshot - Agvance SKY Dispatch** for setup steps.

Location Preference Setup

In the *Location Preference Setup* section, the Location selected in the *Search Locations* drop-down will be the one affected when turning preferences on or off.

The *Show Product Detail in Grower Notification Emails* option is defaulted to off for each Location.

> With this option turned on, the email sent will include estimated Product totals and Product details.

Choosing the **My John Deere Login** button navigates to the login page for My John Deere. This gives the ability to be signed into My John Deere within SKY at the Location level. The red *Not Logged In* text displays to indicate there is no connection to a My John Deere account.
