Grower360 User Maintenance - Agvance SKY Admin

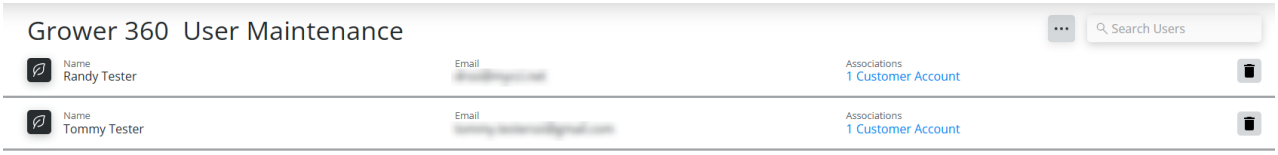

Last Modified on 07/06/2026 2:22 pm CDT

Select **Manage** on the *User Maintenance* card found at *Agvance SKY Admin / Grower360 / User Maintenance* to view Grower360 accounts and the Customer accounts with which they are associated.

To see a video of Grower360 Tools in Agvance SKY Admin, see**here**.

Use the *Search* field at the top of the *User Maintenance* page to search and filter Grower360 users by *Name* or *Email*. Choose the **Ellipsis** to *Download Grower Users* as an Excel file. The **Delete** icon can be selected to remove a Grower360 user and ensure they no longer have access to that Grower360 account.

If discontinuing use of Grower360, all Customer Associations must be deleted using the**Delete** icon prior to SSI Support turning off Grower360. If an Association is not removed, the Grower will continue to receive invalid email notifications when contracts are created.

Select the link in the *Associations* column to display the Customer accounts associated with that Grower360 account. Selecting **View Customer** opens that account in Agvance SKY Customer.
