

Incorrect Nutrient Labels Print on Invoice Priced by Analysis

Last Modified on 07/19/2024 1:07 pm CDT

If pricing an Invoice by guaranteed analysis and the analysis line item has nutrient labels that seem to be jumbled or are incorrect (e.g., ##-##-##-##gZ-##nF), this can be caused by an unnecessary space in the *Soil Test Heading* field, which is user-defined at *Hub / Setup / Company Preferences* on the *Field* tab.

In the *User Defined Soil Test Heading* field, remove any unnecessary spaces.

Setup Hub Location Preferences

00MAIN
