

Read Blender

Last Modified on 01/03/2024 11:35 am CST

This feature, found by choosing **Read Blender** on the *Select a Blend Ticket* window or by editing a ticket and selecting **Capture Blender**, automates the editing of a ticket to actual product loaded when interfaced to an automated blender (such as Junge, Kahler, Murray, or Yargus). If the blender returns a file with actual loaded quantities for each item, those quantities display in the *Done* column of the grid. Saving this screen edits the Blend Ticket Product quantities to the numbers in the *Done* column. Make sure all line items contain a quantity. Application and prepackaged products should also be included in these line items.

The *Archive Blender File* option controls whether or not the blender file may be reused. If this box is not checked, the blender file will be available to use again. If the file was created from the Junge® Blender System, this option is not visible. In this case, the *Done File* found on the Read/Capture of the Blender File is only available for a single use.

This function marks the ticket *Loaded* and affects inventory.

	Name	Original	Done	UOM
1	32-0-0	11753.000	11753.000	Lbs
2	10-34-0	11682.000	11682.000	Lbs
3	12-0-0-26	3055.000	3055.000	Lbs
4	Liquid Spraying	66.200	66.200	Acres
