Dispatch Map Functions

Hover Over Job

Hovering the mouse pointer over the job's icon shows ticket detail. The detail in this window is determined by the selected columns the user has set on the grid window.

Right-Click on Map

Right-clicking on the map shows the map menu. From the map menu, the user can turn on/off the display of locations. The user can also turn on/off the display of jobs, set the route's starting and ending point, clear a route, get the latitude and longitude of the point on the map where the user right-clicked and print the map from this menu.

Print Jobs

Selecting this option from the *Show Jobs* map prints a list of the jobs on the map and a map of the jobs.

Print Route

Selecting this option from the *Show Route* map prints a map of the jobs with the highlighted route and the route directions for the jobs on the map.
