

Export Customer List

Last Modified on 11/06/2024 8:18 am CST

Companies using CompuWeigh or OneWeigh can export Agvance Customers into the program. This allows Customer information to match CompuWeigh and OneWeigh with Agvance. Navigate to *Grain Scale Interface / Transfers / Export / Customer List*.

The screenshot shows a dialog box titled "Export Customer List" with a close button (X) in the top right corner. Below the title bar, there are two input fields. The first is "Export Type" with a dropdown menu currently showing "RRS Dbf". The second is "Export Path" with a text box containing "C:\ExportFiles\" and a folder icon button to its right. At the bottom of the dialog, there are two buttons: "Export" and "Done".

This export can include the following Customer information:

- Customer Names
- IDs
- Location
- Address
- Phone Number
