

Mapping Preferences - Hub

Last Modified on 02/02/2024 9:53 am CST

This area at *Hub / Setup / Mapping Preferences* allows non-Mapping users to set preferences for options related to viewing maps outside of Mapping.

Mapping Preferences

Allows Non Mapping users to set preferences for options related to viewing maps outside of mapping.

Background Road Folder Use BING

Background Image Folder Use BING

Include Date Tested In Test Result Layer Content

Reverse Default Product Theme

Maximum # of features for layer labels: (0 - 1,000)

Minimum scale for layer labels: (0 - 500,000)

Maximum scale for layer labels: (0 - 500,000)

Save

- **Background Road Folder** – Use the **Browse** icon to choose which folder is the background road folder.
- **Use Bing** – Select this to use BING maps for the background roads.
- **Background Image Folder** – Use the **Browse** icon to choose the background image folder.
- **Use Bing** – Select this to use BING maps for the background images. When selected, imagery is cached to the user's temp directory in an *SSI_BC* folder instead of the *Background Image Folder* specified above.
- **Include Date Tested in Test Result Layer Content** – When checked, the date tested is included in the test result layer.
- **Reverse Default Product Theme** – When checked, the coloring theme of the product recs is switched.
