

Add a New Field - SKY Mapping

Last Modified on 02/20/2024 1:56 pm CST

When adding a new field to SKY Mapping, the field and farm may be added in the Agvance Hub first and selected from a populated drop-down list or added from SKY Mapping as the field is being drawn.

1. Navigate to the desired customer and select the **Vertical Ellipsis** icon to the right of the Customer Name.
2. Select **Add New Field**.

Customer Name	Fields	Total Acres	
Barry Anderson Assumption, IL	3	261.92	⋮
North Acres: 252.04	4 <i>Recs</i>	6 <i>Events</i>	⋮
House Farm: Farm One(41), Acres: 0.05	0 <i>Recs</i>	1 <i>Event</i>	⋮
Pond Farm: Fred Anderson Farm, Acres: 9.83	0 <i>Recs</i>	1 <i>Event</i>	⋮

- View/Edit Customer
- Zoom To Fields
- Select All Fields
- Clear Selected Fields
- Delete Customer
- Add Non-Field Feature
- Combine Fields
- Move Fields
- Add New Field**

- If the Field/Farm names have been previously set up in the Agvance Hub:
 - On the *General Information* tab, choose *Farm Name* from the drop-down.
 - The *Field Name* drop-down populates, allowing the Field to be chosen from the list.
 - If the Field/Farm names have not been previously set up in the Agvance Hub:
 - Create a new Field in Agvance SKY by manually entering the Field/Farm name. A new Field will automatically be created and will also display in the Agvance Hub.
 - Fill in any additional information to be stored for the new Field. The information entered here is for reference only.
3. Select **Import** to import a shapefile of the boundary or choose the **Draw** icon to view available drawing tools and to create a Field boundary.
 - Select either the *Polygon* or *Circle* tool to draw a Field boundary.
 - The Field displays the total number of acres within the new boundary.
 4. Choose **Save**. An error message displays if required fields are not completed.
