Getting Started with Grower360

Last Modified on 09/22/2026 7:23 am CDT

More information on the Grower360 Native App can be found **here**.

Customization of colors schemes for the Grower360 portal is available. To learn more about adding custom colors, speak with an SSI representative.

Upon logging into Grower360, the customer name displays at the top of the screen and the Overview page provides a quick view of the customer's account.

- Users can select the *Remember my email address* option on the login page to retain their user email address for future use. Additionally, user credentials are retained for up to 3 months if the user does not log out. After those 3 months, users will need to re-enter their login information. This allows users who do not manually log out to keep returning to the app without the need to enter an email and password.
- Growers seeing an *Error* page with the broken tractor and *Oops* message will need to clear cookies for the Grower360 site to correct the error. See more details on correcting this issue **here**.
