

RFID Tags

Last Modified on 02/14/2024 9:44 am CST

RFID Tags are used to identify the load to a Customer without needing to contact the Customer. RFID Tags are set up under the *Setup* menu in Agvance Scale Interface.

The screenshot shows a window titled "RFID Tag Information" with the following fields and options:

- Tag number: TonyCone1
- <Location>: 01IND
- <Customer ID>: ConTo (Cone Tony)
- Vehicle: Semi
- Inactive
- Notes: (Empty text area)
- Buttons: Save, Cancel

- **Tag Number** – Enter a unique identifier of the tag.
- **Location** – Double-click to select a Location for the tag.
- **Customer ID** – Double-click to select a Customer for the tag.
- **Vehicle** – Enter a description to identify the vehicle associated with the tag.
- **Inactive** – Select this option if the tag is inactive.
- **Notes** – Enter information that pertains to the tag.
