Manage Saved Weights

Last Modified on 07/08/2026 3:45 pm CDT

Manage Saved Weights, found at *Hub / Utilities / Scale Interface / Agvance Scale Interface / Operations*, gives the ability to delete saved weights that are no longer needed and will not be used on any Scale Ticket. This would typically be used if a custom weight (for information only) had been saved.

- **Delete** – After highlighting a saved weight, select to delete the saved weight from database.
- **Rename** – After highlighting a saved weight, choose to edit the saved weight description.
