Lbs of Plant Food - Blend Ticket

Create a fertilizer Blend Ticket. Lbs of Plant Food is the pounds of nutrient per acre.

1. Navigate to *Blending / File / Open / Blend Ticket*. On the *Select a Blend Ticket* window, select the Customer and Field. Choose **Add**.

2. On the *Select a Field* window, verify the bill splits and choose **OK**.

3. On the *Add Blend Ticket* window, choose a *Crop*, *Placement*, and enter any *Billing Notes*.

4. Enter the *Quantity* and select unit of measurement.

5. Choose the *Product Set*, *Optimize By*, and *Price By* options.

6. Enter the *Lbs of Plant Food* per acre in the *N*, *P*, *K*, etc. fields.

7. Select *Lbs of Plant Food* in the *Formulate By* area.
   Note: Selecting **Import Blend** allows access to existing Agvance Blends. Use this to import templates for the most common blend scenarios.

8. Choose **Formulate**. The appropriate products and quantities are calculated to meet the requested analysis and display on the *Products* tab.
   - The *Prices* tab displays the *Products*, *Quantities*, and *Analysis*.
   - The *Blend* tab displays batch breakdowns.

9. Select **Save**.
