Purpose

Based on the selection and frequency for *Category* or *Days Allowed Between* service, a listing of tanks needing to have the service category performed display.

Details

The information for maintenance records is pulled from *Tank History*. The *Category* filter allows limiting the services included in the report. The number of days allowed between completed service can be set.

A service is past due if it has been more than 30 days since the service was needed.

The report is grouped by *Driver*, *Region*, and then *Route*.
