

Grower360 Energy Setup

Last Modified on 03/06/2023 10:34 am CST

Energy tanks and tickets associated with those tanks can be viewed from the Energy menu option in Grower360. This option only displays for growers set up in the Agvance Energy module.

To view Energy tanks and their associated tickets, log in to Grower360 and select *Energy* from the menu. A listing of active Energy tanks displays, including the *Product*, *Est. Tank %*, *Tank Size*, *Last Fill Amt*, and *Last Fill* date.

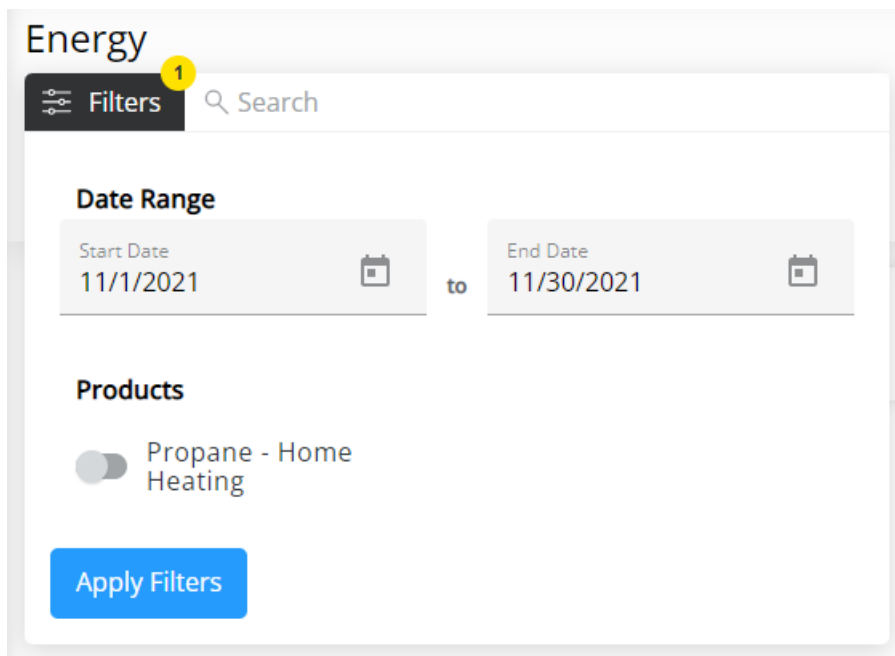

The screenshot shows the Grower360 user interface. On the left is a dark sidebar with the SSI logo and a list of menu items: Overview, Resources, Bookings, Invoices, Payments, Statements, Products, Fields, Patronage, and Energy (highlighted with a red box). The main content area is titled 'Energy' and includes a search bar with a 'Filters' button and a search icon. Below the search bar, it shows 'Filtered by' with a date range of '11/01/2021 - 11/30/2021'. A table displays one energy tank entry:

Product	Last Del Product	Est. Tank %	Tank Size	Last Fill Amt	Last Fill	...
Home Heat	Propane - Home Heating	0%	800 gal	35 gal	11/23/2021	...

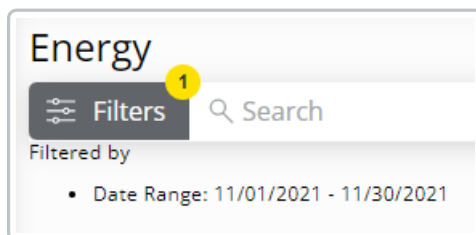

Below the table, it says 'No More Results'.

Note: It is important the Energy tank names in Agvance are set in a way that is fitting for the customer to view. Best practice is to name these tanks in a way that makes sense to the customer as well as staff.

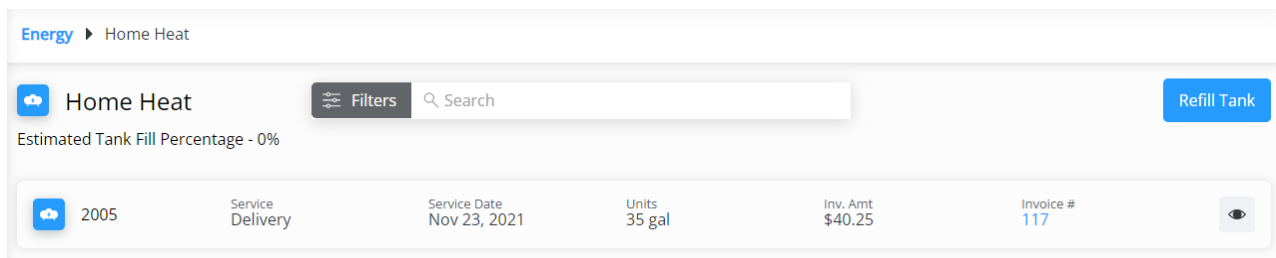

Tanks can be filtered by selecting **Filters** to the left of the *Search* field. Selecting **Filters** displays options to filter tanks by *Date Range* (which is the *Last Fill* date) or *Products*. Tanks can also be searched by the tank name or *Product*.

The filters selected display below the **Filters** button.

To view Energy tickets associated with a tank, select the tank from the list. Each Energy ticket associated with that tank displays, including the *Service type*, *Service Date*, *Units*, *Inv. Amt*, and *Invoice #*.

The *Estimated Tank Fill Percentage* displays at the top of the page. These tickets can also be filtered by choosing **Filters** and selecting a *Start* and *End Date*. Additionally, tickets can be searched by the associated Energy ticket # or the *Invoice #*.

If Tank Monitor Readings are being recorded within Agvance, those values will display in the *Est Tank Percentage* area.

Select the **Eye** icon to view the *Delivered Product*, *Unit Price*, and *End Fill %*.
