

Download NAIP Imagery

Last Modified on 05/23/2024 9:24 am CDT

NAIP imagery is available to download as an alternative imagery source. The following steps outline how to download and set up this imagery data.

Setup

Go to <https://nracs.app.box.com/v/naip> to open the download page.

The screenshot shows a web interface for downloading NAIP imagery. At the top right, there are "Log in" and "Sign up" buttons. Below them, the breadcrumb "naip" is shown next to "1 of 2" and navigation icons. A table lists folders for each year from 2017 to 2023, including the update date and the number of files.

NAME ↓	UPDATED	SIZE
2023	Mar 14, 2024 by A Prior Collaborator	3,506 Files
2022	Dec 22, 2023 by A Prior Collaborator	2,803 Files
2021	Aug 31, 2023 by A Prior Collaborator	3,773 Files
2020	Nov 9, 2023 by A Prior Collaborator	2,782 Files
2019	Jan 26, 2023 by A Prior Collaborator	3,513 Files
2018	Jan 5, 2022 by A Prior Collaborator	2,825 Files
2017	Oct 17, 2019 by A Prior Collaborator	2,032 Files

Imagery is organized by year. Select the desired year, and then choose the state.

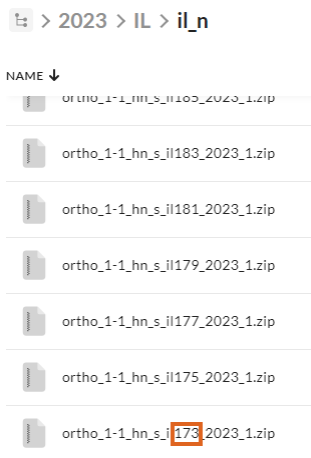

Note: Not all years contain imagery for all states.

The screenshot shows the NAIP imagery download page for the year 2023. At the top right, there are "Log in" and "Sign up" buttons. Below them, the breadcrumb "naip > 2023" is shown next to "1 of 2" and navigation icons. A table lists folders for each state abbreviation (ID, IL, KS, LA, MA, MD), including the update date and the number of files.

NAME ↑	UPDATED	SIZE
ID	Dec 26, 2023 by A Prior Collaborator	92 Files
IL	Feb 27, 2024 by A Prior Collaborator	207 Files
KS	Dec 15, 2023 by A Prior Collaborator	213 Files
LA	Feb 12, 2024 by A Prior Collaborator	131 Files
MA	Dec 7, 2023 by A Prior Collaborator	31 Files
MD	Nov 9, 2023 by A Prior Collaborator	27 Files

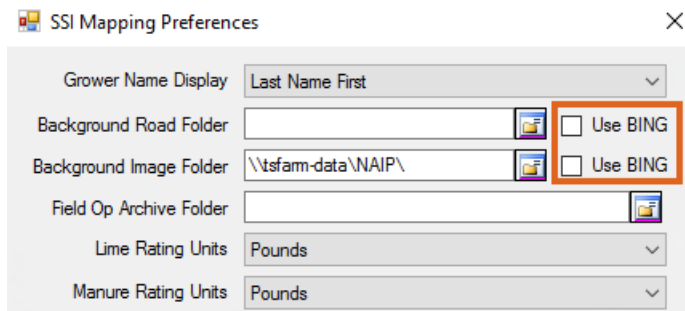

After selecting the state abbreviation, use the state's county codes (FIPS Code) to identify the desired county or counties to be downloaded. County FIPS codes can be found [here](#). The county code can be found inside the file name next to the state abbreviation. For example, in the image below, the county code is 173 for Shelby county.

Once downloaded, it is recommended to store the imagery in an *NAIP* folder on the root level of the server where the Agvance Database folder (typically named *AVDATA*) resides.

Imagery must be unzipped in the *NAIP* folder for Agvance Mapping to read the files.

In Mapping, go to *SSI / Mapping Preferences*. Verify *Use BING* is unchecked. In the *Background Image Folder* area, use the **Browse** button to select the location of the *NAIP* folder, and select **Save**.

Close and reopen Mapping to apply the changes.
