

Logo Setup on Mapping Reports

Last Modified on 01/09/2023 12:58 pm CST

Q. Can a logo be setup to print on Mapping reports?

A. Logos can be setup to print on Mapping reports by navigating to *Mapping / SSI / Mapping Preferences*. At the bottom of the *SSI Mapping Preferences* window, select the **Select Logo** button.

SSI Mapping Preferences

Grower Name Display: Last Name First

Background Road Folder: [Browse] [Use BING]

Background Image Folder: [Browse] [Use BING]

Field Op Archive Folder: [Browse]

Manure Rating Units: Pounds

Lat / Lon Format: Decimal Degrees 6

☐ Include Collected Date in Layer Name

☐ Include Date Tested In Test Result Layer Content

☐ Ignore Location Filter For Commodities

☐ Use Mapping Rec Description for Fertilizer Items

☐ Reverse Default Product Theme

Special Mapping Instructions

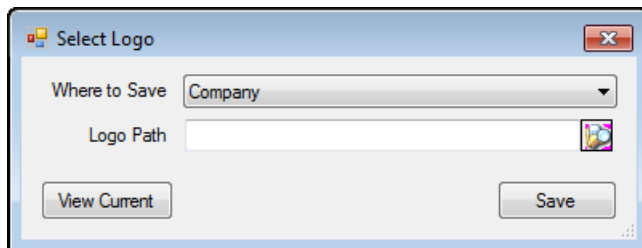

Customer Attribute for Special Mapping Instructions

Mapping Instructions

| | Location | Special Instructions |
|---|----------|----------------------|
| 1 | East | |
| 2 | Main | |
| 3 | Master | |
| 4 | North | |

Select Logo Save

The *Select Logo* window displays.

Select Logo

Where to Save: Company

Logo Path: [Browse]

View Current Save

Designate the level at which the logo should appear from the *Where to Save* dropdown menu. For example, a logo can be saved at the *Company* level, *Territory*, *Location*, or a particular *Grower*.

Select the path to where the logo is saved using the *Logo Path* textbox.

Note: Acceptable file formats for logos are .JPG, .PNG, or .BMP.

A logo that is wide and short is recommended as this is the shape of the logo box on the Mapping reports. It is also best to eliminate as much white space as possible around the logo because it is automatically resized to fit the logo area on reports. Logos can be edited, saved, and selected again in this window.
