

Blend Ticket Analysis in LBS Instead of Tons

Last Modified on 12/21/2022 9:34 am CST

Q. When pricing a blend by analysis, why is the analysis of the blend being priced by the pound instead of by the ton.

A. The first product on the Blend Ticket has a *Billing Unit* of *LBS*. When pricing by analysis, the *Billing Unit* of the first product on the Blend Ticket is the *Billing Unit* used for the pricing of the analysis. Re-ordering the products on the Blend Ticket where the first line item has a *Billing Unit* of *Tons* will show the analysis priced by *Tons*.
