

What is Show Me - SKY Analytics

Last Modified on 03/02/2022 10:47 am CST

On an Analytics Worksheet, Show Me creates a view based on fields already being used and any fields selected in the Data pane.

1. Select the fields to analyze in the *Data* pane. Hold the **Ctrl** key to make multiple selections.
2. Select **Show Me** on the toolbar at the far right and then choose the type of view to create. The selected fields are evaluated and options display of several types of views appropriate for those fields.
3. Any view type in full color will generate a view of the data. Hover over each view type and the description at the bottom shows the minimum requirements. **Show Me** also highlights the visualization type best matching the data with an outline.
4. A view of the data is created.
