Flat Rate Fees - Grain

Last Modified on 11/06/2026 7:35 am CST

To apply flat rate per load fees such as inspection fees, etc. when settling units from Scale Tickets or Assembly Sheets, see the following.

Rules

Premium/Discount Schedules

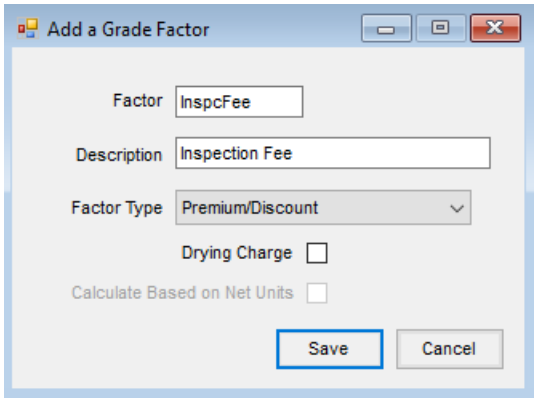

The same *Premium/Discount Schedule* name must be used to represent all types of flat rate fees that will be applied at Settlements (**Ex:** the schedule name used in the following example is *FltFee*). This name must be unique and used only to represent flat rate type fees.

A Premium/Discount table for each type of flat rate fee that is charged needs to be set up for each Commodity to which the flat rate fee applies and must be set as the *Master Table*.

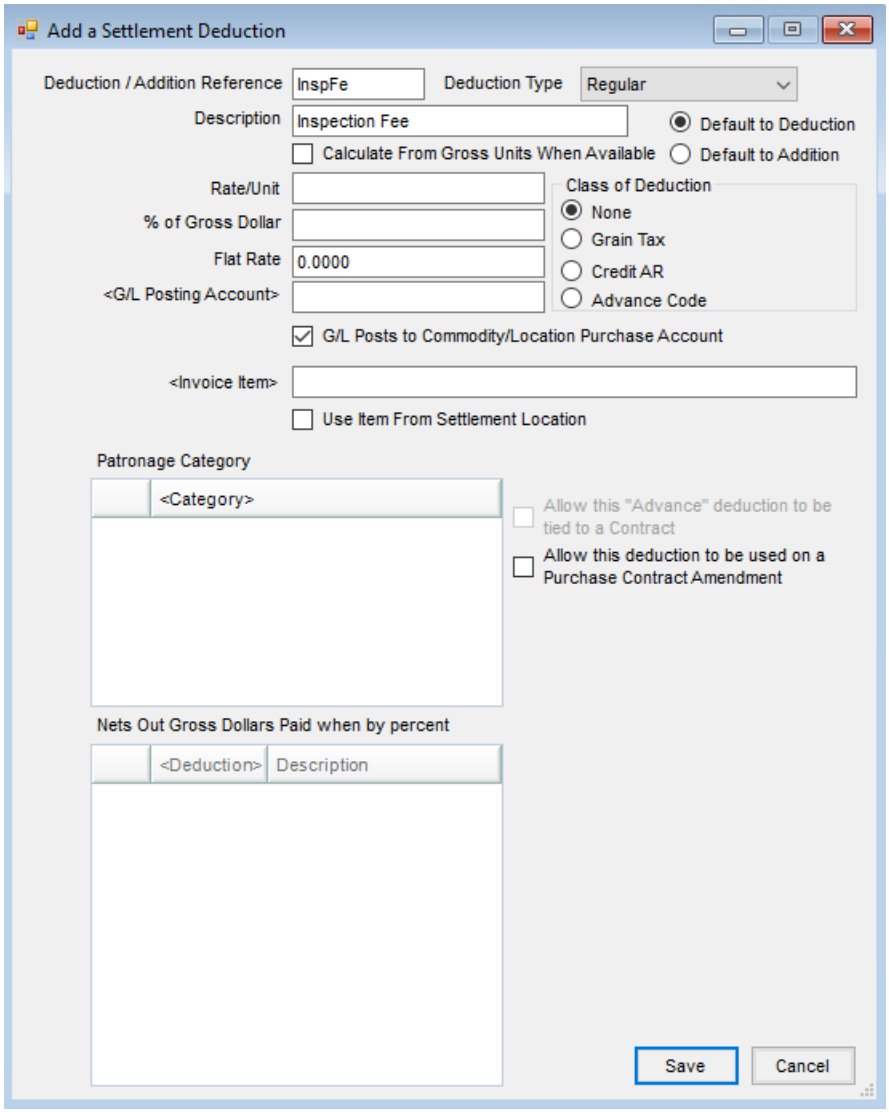

- **Step Size** – The *Step Size* must be set to *0*.
- **Grade Factor** – A Grade Factor must be set up for each type of flat fee to be charged.
- **Settlement Deduction** – A Settlement Deduction must be set up for each type of flat fee to be charged.
- **Preference** – The *Flat Fee PD Schedule* name that represents all flat rate fees must be entered on the *Purchases* tab at *Grain / Setup / Preferences*.

Setup

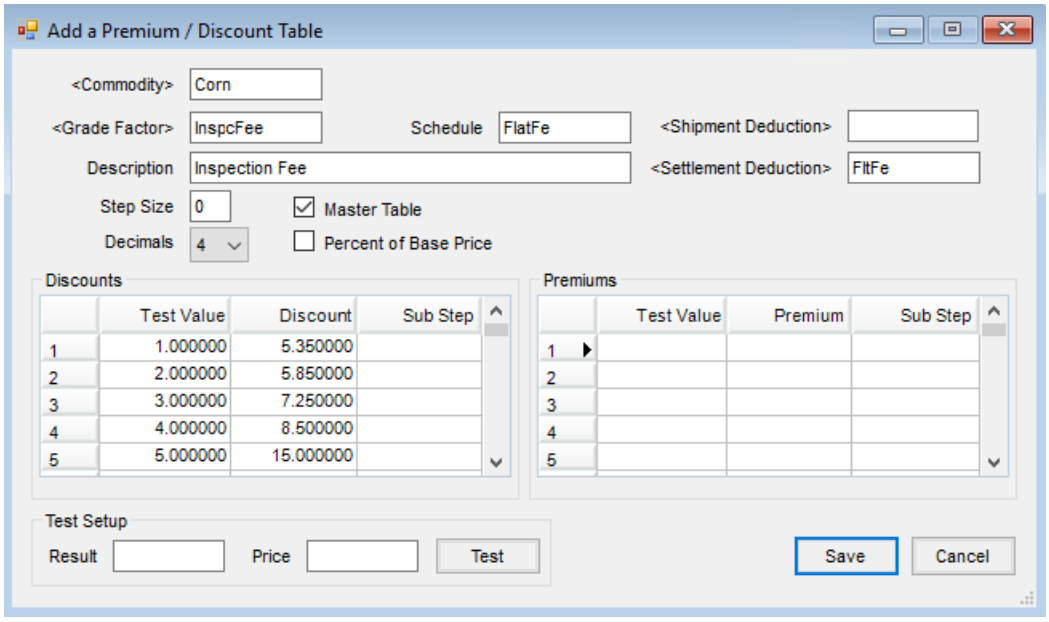

1. Go to *Grain / Setup / Grade Factors* and choose **Add**.
2. Add a Grade Factor for each type of flat fee that could be applied at settlement.

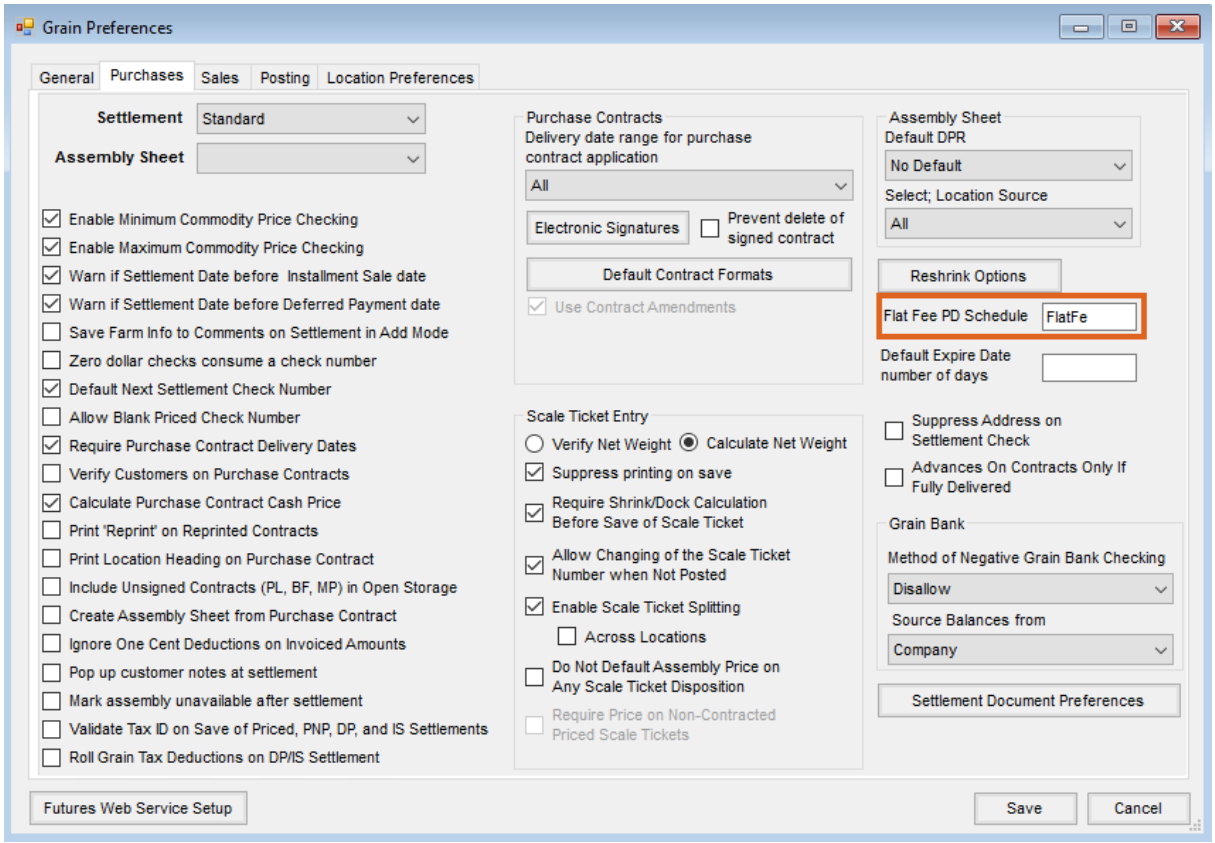

3. Go to *Grain / Setup / Settlement Deductions* and select **Add**.
4. Add a settlement deduction for the each type of flat fee that could be applied at a settlement.

5. Go to *Grain / Setup / Premium/Discount Tables* and select **Add**.
6. Set up a Premium/Discount table for each type of flat rate fee that can be applied. There will be one table for each Commodity.

7. Go to the *Purchases* tab at *Grain / Setup / Preferences*.
8. Enter the schedule name that represents flat rate type fees into *the Flat Fee PD Schedule* field.

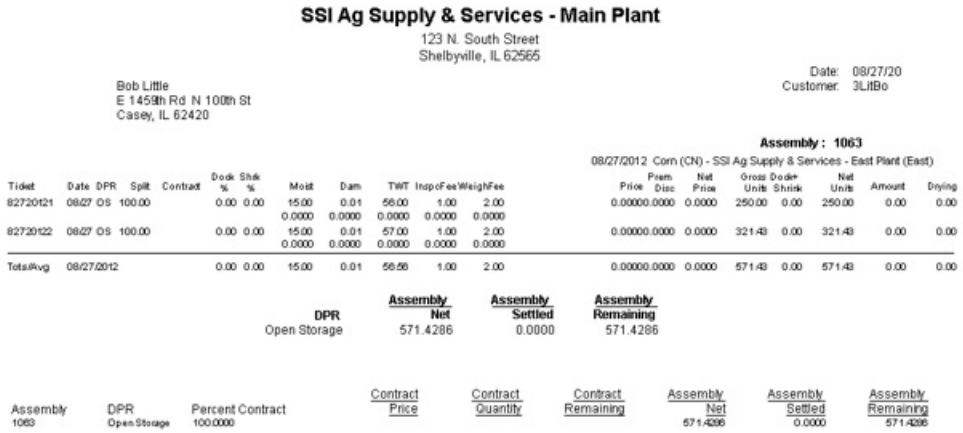

Note: The *Flat Fee PD Schedule* specified here will cause the dollar amount of the PD to be calculated **ONLY** at the time of Settlement.
