

# Scale Ticket Level Management Mode - Lock Scale Ticket Schedules Utility

Last Modified on 06/26/2024 3:09 pm CDT

In Grain, there are two models of operation:

- The Standard model where Scale Tickets are directly associated to the Assembly
- Scale Ticket Level Management where Scale Tickets have an independent relationship to the Assembly.

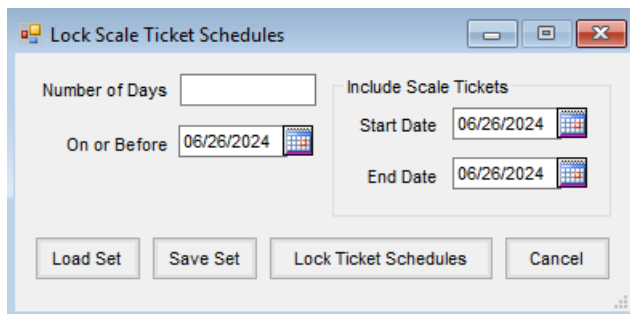

Setup for these two models is inherently different and therefore not interchangeable within Grain.

The information in this article is specific to the Scale Ticket Level Management model.

The Lock Scale Ticket Schedules utility marks all split lines of a ticket as *Reshrunk*. This utility is primarily used for companies that shrink by disposition of the splits at the time of importing tickets into Agvance Grain.

## Details

To access this utility in the Grain module, go to *Utilities / Lock Scale Ticket Schedules*.

The screenshot shows a dialog box titled "Lock Scale Ticket Schedules". It contains the following fields and controls:

- Number of Days:** An empty text input field.
- On or Before:** A date input field containing "06/26/2024" with a calendar icon to its right.
- Include Scale Tickets:** A section containing two date input fields:
  - Start Date:** A date input field containing "06/26/2024" with a calendar icon to its right.
  - End Date:** A date input field containing "06/26/2024" with a calendar icon to its right.
- Buttons:** Four buttons are located at the bottom: "Load Set", "Save Set", "Lock Ticket Schedules", and "Cancel".

The Lock Scale Ticket Schedules utility updates non-reversed, non-direct shipped, grain posted tickets which are *On or Before* the selected date and have aged by the *Number of Days* entered (grace days can be given for the Grower to decide). The Scale Tickets considered for locking must also be dated within the *Start Date* and *End Date* range.

When a split line is marked as *Reshrunk*, the Dock, Shrink, and Drying Schedules are not updated when changing the DPR of the split line.

After designating the *Number of Days*, the *On or Before* date, and the *Start Date* and *End Date* range in the *Include Scale Tickets* section and setting the **Save Set** date values, run the utility once by selecting **Lock Ticket Schedules**. This completes the manual setup.

The utility can be run from AGVAgent after the setup is complete and run manually the first time. Once run manually, **Save Set/Load Set** may be selected in AGVAgent.

**Note:** If the *Reshrink Utility* is used, locking will be complete and the Lock Scale Ticket Schedules utility is not needed.
