

Blend Ticket is Loaded but Not Invoiced

Last Modified on 12/21/2022 9:09 am CST

Q. If Blend Tickets are loaded and do not get invoiced right away, what happens?

A. When a Blend Ticket is loaded it affects inventory. If a Blend Ticket is edited and the quantities are adjusted, inventory is adjusted as well. When the Blend Ticket is invoiced, the Invoice affects Accounts Receivable but inventory is only affected if there is a change in quantity at invoice time.

After a Blend Ticket is loaded, it can be invoiced at any time.
