

Quote Status on Blend Ticket or Plan / Sales Order

Last Modified on 12/21/2022 9:17 am CST

Q. I have changed prices on both customers then set the *Quote* status. On the second customer, the *Quote* status is not set.

A. If you use the **Apply Prices to All** button, you will need to have the *Quote* status set before clicking on that button. If it is not done in this order, other customers' pricing in the split may not be correct, and the *Quote* status for each customer on the split will need to be manually set.
