Layer Export

Last Modified on 05/28/2025 10:48 am CDT

In Agvance Mapping, layers are exported in Shapefile format. A Shapefile is a universal GIS file used in many other agricultural GIS software packages. They are easily distributed to others or to SSI support personnel. This is done by right clicking on the layer, selecting *Export*, and then *Export Layers*. A *Save* window will open. Select a location for the file to be saved, and enter a name for the file.

Five files will be exported to the saved location, which together make up a Shapefile.

Name	Date modi...	Type	Size
MYYA Zones.dbf	06/27/20...	DBF File	1 KB
MYYA Zones.mcd	06/27/20...	MCD File	1 KB
MYYA Zones.prj	06/27/20...	PRJ File	1 KB
MYYA Zones.shp	06/27/20...	SHP File	171 KB
MYYA Zones.shx	06/27/20...	SHX File	1 KB
