Enabling the Right-Click on the Edit Data Table

Last Modified on 12/28/2022 4:57 pm CST

Q. When right-clicking on the *Edit Data* table, why does the menu containing the *Add 'Nutrient From'* Column option not display?

A. The antivirus software may be the issue.

Norton Anti-Virus tool bars can disable the user's ability to right click and view the *Add Nutrient from Column Menu*. For this option to be available, the Norton Anti-Virus tool bar needs to be disabled.

To disable this toolbar, go to the **Customize and control Google Chrome button** in the upper right hand corner of the web browser. Select *More tools / Extensions*. Uncheck the *Enable* option for the *Norton* toolbar.

The right-click functionality should now be available in the *Edit Data* table.
