

# California Prop 65 Warning Statement

Last Modified on 01/09/2023 1:49 pm CST

**Q.** In California, if products are labeled as Prop 65, also known as Proposition 65, the Hazardous Materials shipping documentation must contain clear and reasonable warnings. How can a warning be setup in Agvance to print on the Hazardous Materials shipping documentation?

**A.** The warning statement may be setup at *Hub / Setup / Company Preferences*. On the *General* tab, enter the Prop 65 Warning Statement that should display on the Hazardous Materials shipping manifest when products marked as Prop 65 are being shipped.

**Note:** There are some variations allowed by the state of California for the Prop 65 warning.

Below is one example of the allowable warning statements:

The screenshot shows a 'Preferences' dialog box with several tabs: General, Field, Customer, Product, Farm, Grain Scale Interface, and API. The 'General' tab is active. It contains the following fields and options:

- Login Using Windows User
- Allow users to login from multiple machines
- Mail Host: [Text Box] Port: [Text Box]  Use SSL
- If no Mail Host Port is specified, default port 25 will be used.
- Mail Host Email: Address: [Text Box] Password: [Text Box]
- Mail Host and Port must be filled out if using Mail Host Email
- Map Layer: [Text Box]
- Password: [Text Box]
- Filter Invalid Databases
- Prop 65 Warning Statement: [Text Box containing: 'WARNING: This product may contain a chemical known to the State of California to cause cancer, or birth defects or other reproductive harm.']
- Buttons: AGIS Setup, KwikTag Setup, Print, Save, Cancel
- Web API Database Connection Information: API Database ID: [Text Box], Contact SSI Support to complete your setup, Activate Mobile Sales button

When Agvance products are linked to a supported chemical regulatory database interface, the Prop 65 flag will be set accordingly. When not interfacing with a supported chemical regulatory database, the Prop 65 flag can be manually set on the **Safety** tab of each product that is regulated as such.

After the warning statement is added in *Company Preferences* and the products are flagged as Prop 65, the Haz Mat prints the warning statement.

The product(s) to which the statement applies will be denoted by asterisks, such as '\*\*', to the left of the product name on the Haz Mat.

**Note:** In addition to the setup above, the warning will only be triggered when the destination state is set to California.

Checking is done in the following hierarchy.

- Field
- Customer Ship To Address
- Customer
