

# Type of Work Classification Setup

Last Modified on 02/28/2022 11:21 am CST

## Overview

Type of Work Classifications may be setup and used in Agvance Dispatch.

## Setup

Type of Work Classifications are inventory departments included in a classification, such as 'Dispatch Type of Work'. To setup this classification, navigate to the *Hub / Setup / Company Preferences / Product* tab and select the **Department Classifications** button.

If a *Dispatch Type of Work* classification does not exist, it should be added. Select the **Add** button, and enter the *Name* of the department classification. Double-click on the *Dept ID* or *Department Name* column heading to select the necessary service fee departments.

After the setup is complete, click **Save**.

Open the Dispatch module. In the *Agronomy Work Orders* window, select the **Setup** button. On the *General* tab of the *Multi API Work Order Setup* window, select *Dispatch Type of Work* from the *Type of Work Classification* dropdown menu.
