

# Separate EPA Numbers for COPAK Setup

Last Modified on 01/09/2023 1:18 pm CST

Q. How can a COPAK chemical product that is a combination of separately registered products be setup in Agvance so individual Hazmats may be printed for each registered product? In this scenario, the COPAK product is used on purchasing and sales transactions.

Note: Examples of COPAKs that fall into this situation are Trivapro and Orondis. The following steps use the Orondis Opti COPAK as an example of the setup in Agvance.

A. Setup each raw ingredient product individually in Agvance and link each to the correct regulatory database interface product.

The image below shows the Orondis Opti A product linked to the regulatory database interface.

The screenshot displays the 'Product Information for Pesticides - Main / Orondis Opti A' window. The 'Profile' tab is active, showing the following details:

- EPA #: 100-1572
- Active Ingredient: Oxathiapiprolin
- Threshold: 0
- Packing Group: (empty)
- Hazard Class: None
- Placard: (empty)
- UN/NA ID: (empty)
- Chemical Database: Agrian ID 15728, DOT Config 2,20, floz, Size ID 16764893
- Last Updated: 04/20/2016
- Shipping Name: Insecticides or fungicides, agricultural, liquid, NOI; other than poison. (NOT DOT REGULATED BY HIGHWAY TRANSPORTATION)
- Nat. Motor Carrier Class.: (empty)
- Safety Comments: (empty)
- DOT Warning Note: (empty)

Additional options include checkboxes for 'Federally Restricted', 'Potentially Hazardous', 'Warning' (Posted, Oral), and 'Prop 65'. Navigation buttons at the bottom include 'View SDS', 'View Label', 'View WPS', 'Refresh', 'Threshold', 'Ratio Wizard', 'Manufactured Formula', 'Save', and 'Cancel'.

The image below shows the Orondis Opti B product linked to the regulatory database interface.

After the raw products have been setup, add the COPAK product. This will be setup with a manufactured formula containing both raw ingredients to print the separate EPA numbers on the HAZMAT shipping order. Enter the quantities that make up the COPAK product and select the *Split Out When Printing HAZMAT* option.
