

# Separate EPA Numbers for COPAK Setup

Last Modified on 12/12/2024 9:48 am CST

A COPAK chemical product that is a combination of separately registered Products can be set up in Agvance so individual Hazmats may be printed for each registered Product. In this scenario, the COPAK Product is used on purchasing and sales transactions.

**Note:** Examples of COPAKs that fall into this situation are Trivapro and Orondis. The following steps use the Orondis Opti COPAK as an example of the setup in Agvance.

Set up each raw ingredient Product individually in Agvance and link each to the correct regulatory database interface Product.

The image below shows the Orondis Opti A Product linked to the regulatory database interface.

The screenshot shows the 'Product Information for Chemicals -00 / Orondis Opti A' window. The 'Safety' tab is selected, showing the following details:

- EPA #: 100-1572
- PCP #: [Empty]
- Active Ingredient: Oxathiapiprolin
- Threshold: 0
- Packing Group: [Empty]
- Hazard Class: None
- Placard: [Empty]
- UN/NA ID: [Empty]
- Chemical Database: Agrian ID 15728
- DOT Config: 2,20,floz
- Size ID: 16764893
- Last Updated: [Calendar icon]
- Buttons: View SDS, View Label, View WPS, Refresh

Additional safety and regulatory options include:

- Federally Restricted
- Potentially Hazardous
- Warning:  Posted,  Oral
- GHS Required
- Prop 65 Details button
- State Restricted button
- Re-Entry Interval (Hours): [Input field]
- Available For Distribution button
- Shipping Name: Insecticides or fungicides, agricultural, liquid, NOI; other than poison. (NOT DOT REGULATED BY HIGHWAY TRANSPORTATION)
- Nat. Motor Carrier Class.: [Dropdown menu]
- Safety Comments: 1, 2, 3 [Input fields]
- DOT Warning Note: [Input field]

Navigation and action buttons at the bottom include: Threshold, Ratio Wizard, Manufactured Formula, Save, and Cancel.

The image below shows the Orondis Opti B product linked to the regulatory database interface.

 DOT Warning Note

After the raw Products have been set up, add the COPAK Product. This will be set up with a manufactured formula containing both raw ingredients to print the separate EPA numbers on the HAZMAT shipping order. Enter the quantities that make up the COPAK Product and select the *Split Out When Printing HAZMAT* option.
