

# Steps for Touch ID or Facial Recognition

Last Modified on 08/10/2023 9:25 am CDT

Customers can adjust settings on iPhones to utilize the Touch ID or Facial Recognition features with Grower360.

The following steps allow Touch ID or Facial Recognition to work with the Grower360 app using an Apple device.

**Note:** This is a general guide. Depending on the device iOS or type, this may not reflect the exact steps to be taken.

1. Within iPhone **Settings**, under *Touch ID/Face ID & Passcode*, turn on *Password AutoFill*.
2. Ensure the *User Name* and *Password* are associated with the correct app URL by going to *Settings / Passwords*.
3. Open the Grower360 app.
4. Tap in the *Email* field to open the keyboard.
5. Choose the **Passwords** shortcut and use Touch ID or Face Recognition (whichever is available for the device being used).
6. From the list of saved login information, choose the appropriate User Name and Password.
7. Tap **Login**.
