

# Setting Up and Using Blend Fees

Last Modified on 01/09/2023 1:15 pm CST

## Q. What is a blend fee, and how do I set it up?

A. A blend fee is a product set up to represent a charge for blending, delivery, or equipment for fertilizer, feed, etc. It is usually set up in a *Fee Inventory Department* in the Hub.

Blend fees may be setup as *Hidden* or *Unhidden*. Unhidden blend fees are set up on the *Blending / Setup / Location Preferences / Miscellaneous* tab. Hidden blend fees are set up at *Hub / Setup / Location Preferences*.

Items set up as *Hidden Blend Fees* do not show up individually on the Invoice, Consolidated Blend, or Custom App when priced by Blended or Guaranteed Analysis but are added to the total cost of the blend.

*Unhidden Blend Fee* items show up as individual products on the Invoice, Consolidated Blend, and Custom App when priced by Blended or Guaranteed Analysis and are added to the total cost of the blend.

Both *Hidden* and *Unhidden Blend Fee* items are prorated during the *Edit to Actual* function.

**Note:** When setting up *Blend Fee* products in the Hub, the *Unit Weight* must be entered as '0'.
