Using Crop Chemistry in Agvance

Last Modified on 05/21/2025 7:41 am CDT

Crop Chemistries may be set up and used on Agvance Blend Tickets to denote the ticket is a certain chemistry, allowing the Blend Ticket to be assigned to the correct sprayers. When a *Crop Chemistry* is selected, it displays on the ticket to help avoid crop damage from incorrect application.

Setup

A *Crop Chemistry* type must be set up in the Agvance Blending or Planning module at *Setup / Crop Chemistry*. Choose **Add** to create a new Crop Chemistry. Enter the name to print on the Blend Ticket and Custom Application sheets to denote the Crop Chemistry.

Require Crop Chemistry

Select **Product Classifications** on the *Product* tab at *Hub / Setup / Company Preferences* and choose **Add**. Enter a *Name* for the Classification (ex. *Crop Chemistry Required*), and select the Products that should require a Crop Chemistry to be selected on the ticket.

Note: Optionally, select entire Inventory Departments if desired.

After the Classification is set up, navigate to the Blending or Planning module. On the *Miscellaneous* tab at *Setup / Location Preferences*, set the *Blend Ticket – Crop Chemistry* preference to *Disallow Save*.

Note: The Blend-Ticket - Crop Chemistry preference may be set to No Checking, Warning Only, or Disallow Save.

From the Select Product Classification to Check drop-down, choose the Product Classification just set up.
