

Moving Customers to Agvance SKY Mapping

Last Modified on 07/08/2026 1:35 pm CDT

Customers can easily be imported into Agvance SKY Mapping directly from Agvance Windows.

1. In Agvance Windows, go to *Hub / Setup / Company Preferences / API / Mapping Interface* and choose **Select** in the *Send Customers to Mapping* area.
2. On the *Select Customers* window, use the filtering options to select the customers to be linked to Agvance SKY Mapping.
 - On the *Filter* tab, a *Fields* filtering option is available:
 - **All** – Filter for all customers regardless of Field setup.
 - **No fields** – Filter for Customers with no Fields.
 - **With fields** – Filter for Customers with Fields set up.
 - **With fields with boundary** – Filter for customers with Field boundaries.
 - With the desired filters selected, choose **Apply** then return to the *Customers* tab.
3. With the desired customers selected, choose **Done**.
4. Select **Send to Mapping**. Customers will be linked and available in Agvance SKY Mapping
