Moving Customers to SKY Mapping

Last Modified on 02/28/2022 1:23 pm CST

Customers can easily be imported into Agvance SKY Mapping directly from the Agvance program.

1. In Agvance, go to *Hub / Setup / Company Preferences / API / Mapping Interface* and choose **Select** in the *Send Customers to Mapping* area.

2. On the *Select Customers* window, use Agvance filtering options to select the customers to be linked to SKY Mapping

    - On the *Filter* tab, a *Fields* filtering option is available:

        - **All** – Filter for all customers regardless of Field setup.

        - **No fields** – Filter for customers with no Fields in Agvance.

        - **With fields** – Filter for customers with Fields set up in Agvance.

        - **With fields with boundary** – Filter for customers with Field boundaries set up in Agvance Mapping.

    - With the desired filters selected, choose **Apply** then return to the *Customers* tab.

3. With the desired customers selected, choose **Done**.

4. Select **Send to Mapping**. Customers will be linked and available in SKY Mapping
