Mapping Menu - Agvance SKY Mapping

Last Modified on 07/08/2026 1:51 pm CDT

The *Mapping* menu provides options to navigate, search, and take measurements in the mapping area.

Map Extent

Select **Extent** to navigate the *Mapping* window.

- **Previous** – This moves to the map boundary last viewed. If the map was not previously zoomed to a different Field boundary, this will navigate to the area of the map last viewed.
- **Next** – This moves to the next Field boundary.
- **Full** – This displays the full extent of the map. All Fields added to the Customer list will be shown.

Measure Tool

Select **Measure** to measure any distance in the *Mapping* area.

- **Area** – Measure by *acre*, *square feet*, or *square yard*.
- **Line** – Measure by *feet*, *inch*, or *yard*.
- **Lat/Lon** – Change the *Coordinate Format* to *DD* or *DMS*.

Search

Select **Search** to zoom to any location on the map.

- **City/Zip** – Enter any city or zip code and choose the **Search** icon.
- **Lat/Lon** – Enter a specific *Latitude* and *Longitude*.
- **PLSS** – Enter a *State*, *Township*, *Range*, and *Section* to zoom to that location.
- **Non-Field** – Select in this field to search based on Non-Field features. Choose from the drop-down that displays.
- **Event ID** – Select in this field to search based on Event IDs. Choose from the drop-down menu.
