

Mapping Menu - SKY Mapping

Last Modified on 03/01/2022 3:27 pm CST

The *Mapping* menu allows the options to navigate, search, and take measurements in the mapping area.

Map Extent

Select **Extent** to navigate the *Mapping* window.

- **Previous** – This moves to the map boundary last viewed. If the map was not previously zoomed to a different Field boundary, this will navigate to the area of the map last viewed.
- **Next** – This moves to the next Field boundary.
- **Full** – This displays the full extent of the map. All Fields added to the Customer list will be shown.

Measure Tool

Select **Measure** to measure any distance in the *Mapping* area.

- **Area** – Measure by *acre, square feet, or square yard*.
- **Line** – Measure by *feet, inch, or yard*.
- **Lat/Lon** – Change the *Coordinate Format* to *DD* or *DMS*.

Search

Select **Search** to zoom to any location on the map.

- **City/Zip** – Enter any city or zip code and choose the **Search** icon.
- **Lat/Lon** – Enter a specific *Latitude* and *Longitude*.
- **PLSS** – Enter a *State, Township, Range, and Section* to zoom to that location.
- **Non-Field** – Select in this field to search based on Non-Field features. Choose from the drop-down that displays.
- **Event ID** – Select in this field to search based on Event IDs. Choose from the drop-down menu.
