SKY Soil Test Report

The Sky Soil Test Report displays soil test results by point including a surface layer. The surface view can be updated in the Layers tab of SKY Mapping to reflect different legend values or color ramps.
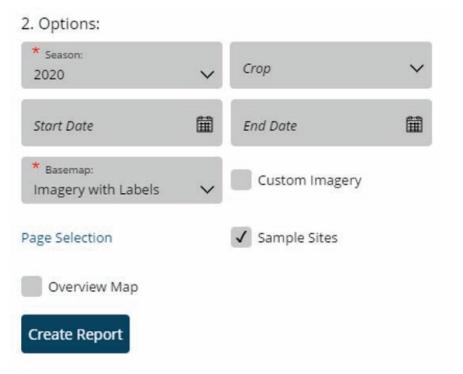

1. Navigate to *Reports / SKY Mapping* and select the *Sky Soil Test Report*.

1. Select Report:

- Sky Application Report
- Sky Crop Planning Report
- Sky Recs Report
- Sky Scouting Detail
- Sky Scouting Report
- ✓ Sky Soil Test Report
- Sky Soil Type Map
- Sky Yield Map

2. Select the desired Field(s).

   Note: Individual Events under each Field can also be selected. When multiple Events are selected, they will display per Field.

3. Choose the appropriate season from the *Season* drop-down under *Options*.

2. Options:

* Season:	Crop
2020	

Start Date 🗓	End Date 🗓

* Basemap:	☐ Custom Imagery
Imagery with Labels	

Page Selection   ✓ Sample Sites

☐ Overview Map

Create Report

4. Select the desired Basemap imagery from the *Basemap* drop-down.

5. Optionally select the following report criteria:

- Crop – Select to run the report for only the Crop selected on the chosen Field(s).
- Start / End Date – Choose to include only Recs within the selected date range.
- Custom Imagery – Select if custom drone imagery has been imported for the chosen Field.
- Sample Sites – Choose to display sample sites along with the surface.
- Overview Map – Select to add a boundary overview of the Field(s) to the report.
- Page Selection – Choose specific nutrients to display per page.

6. Once all desired report criteria are selected, choose **Create Report**.

   Note: If no Events are available per the report criteria selected, a warning message displays, and the report fails to run.

7. The report displays in the *Reports Based on Field Selection* grid with a *Status* of *In Progress*. Choose **View Report** to open the report.
