SKY Yield Map Report

Last Modified on 07/08/2026 1:10 pm CDT

The SKY Yield Map report displays the harvested yield monitor data and field stats to create a visualization of data collected throughout the harvesting season.

1. Navigate to *Reports* and select the *SKY Yield Map* report. Choose the appropriate season from the *Season* drop-down under *Options*.

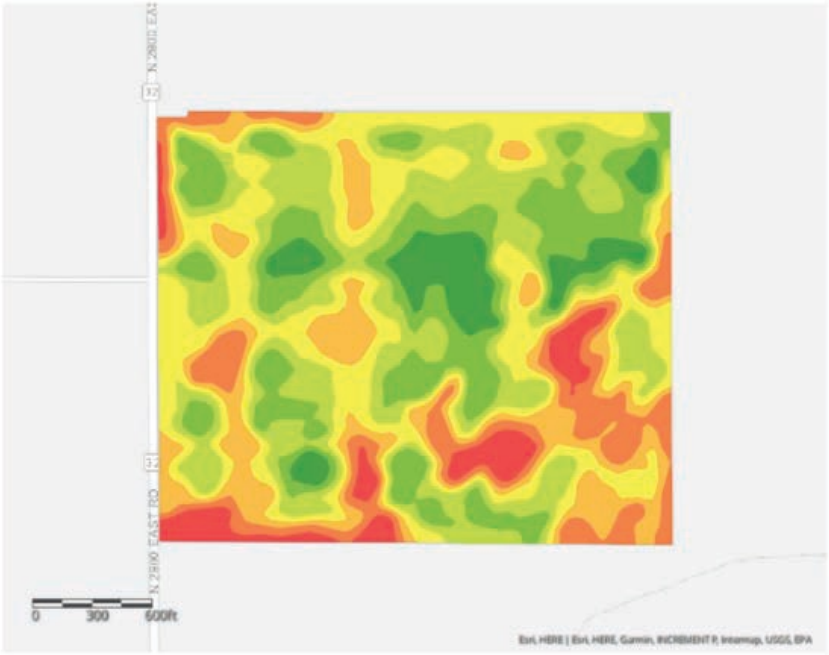

2. Select the desired Basemap imagery from the *Basemap* drop-down. Optionally select the following report criteria:
    - **Crop** – Select to run the report for only the Crop selected on the chosen Field(s).
    - **Start / End Date** – Choose to include only Recs within the selected date range.
    - **Custom Imagery** – Select if custom drone imagery has been imported for the chosen Field.
    - **Overview Map** – Select to add a boundary overview of the field to the report.
3. Select the desired Field(s).

    Note: Multiple Fields and Events can be selected. If selecting multiple Events, the Events will display per Field on the report.
4. Once all desired report criteria are selected, choose **Create Report**.

    Note: If no Recs are available per the report criteria selected, a warning message displays and the report fails to run.
5. The report displays in the *Reports Based on Field Selection* grid with a *Status* of *In Progress*. Choose **View Report** to open the report.
6. The report prints in *Polygon* format with statistics based on filters set up on the selected Event(s).
